## Developing Applications in IBM Business Process Manager Advanced V8.5.7 - I

CÓDIGO:	DURACIÓN:	Precio:
WB860G	40 Hours (5 días)	€2,200.00

### Description

This course teaches you how to use the tools in IBM Business Process Manager Advanced V8.5.7 to build and deploy process integration solutions.

IBM Process Server supports a service-oriented architecture (SOA) by providing a platform for using diverse technologies to integrate business applications. In this course, you learn how IBM Process Server enables business integration applications to define business logic and processes based on Web Services Business Process Execution Language (WS-BPEL), and business rules. In the intensive hands-on lab exercises, you design, develop, and test a comprehensive business integration solution. You use the IBM Integration Designer tool to create business integration solutions by using the Service Component Architecture (SCA) programming model, the Service Data Objects (SDO) data model, and the mediation flow programming model. For information about other related courses, see the IBM Training website:

### Objetivos

After completing this course, you should be able to:

- Describe the purpose and business value of a service-oriented architecture
- Describe the purpose and business value of the tools included in IBM Business Process Manager Advanced V8.5.7: IBM Process Designer, IBM Integration Designer, IBM Process Server, IBM Process Center, IBM Process Portal, and Business Space
- Identify and describe the features that are available in IBM Process Designer, IBM Integration Designer, and the Service Component Architecture
- Describe the structure of modules and libraries
- Create business objects, shared interfaces, and business calendars
- Model a complex business process diagram in IBM Process Designer
- Create a complex business process that includes basic and structured WS-BPEL activities in IBM Integration Designer
- Use SCA bindings to communicate with web services
- Use WebSphere Java EE Connector Architecture (JCA) adapters in applications
- Implement data maps to transform business data
- Implement mediation modules to route and transform messages
- Implement business rules and use the Business Rules Manager web client to interact with business rules at run time
- Create a business space by using widgets and templates that are available for IBM Business Process Manager Advanced V8.5.7
- Create and run component test projects in IBM Integration Designer
- Bring the UTE Process Server online and connect with the Process Center
- Explore the IBM Process Center repository
- Create and implement an Advanced Integration service (AIS) in IBM Process Designer and IBM Integration Designer

### Público

This course is designed for system administrators, integration specialists, application developers, business process developers, support engineers, and technical sales and marketing professionals.

### Requisitos Previos

Before taking this course, you should have:

- Basic Java and Java Platform, Enterprise Edition (Java EE) skills

- Basic Extensible Markup Language (XML) skills

Successful completion of course *Process Implementing with IBM Business Process Manager Standard/Adv V8.5.6 - I* (WB819G) is highly recommended, but not required.

## Programa

Course introduction  
Introduction to IBM Business Process Manager V8.5.7  
Overview of IBM Business Process Manager Advanced V8.5.7  
Exercise: Exploring IBM Process Designer and IBM Process Portal  
Course business scenario: What you build  
IBM Integration Designer overview  
Exercise: Exploring IBM Integration Designer, part I  
Service Component Architecture overview  
Exercise: Exploring IBM Integration Designer, part II  
SCA bindings  
Exercise: Working with web services  
Business objects  
Exercise: Creating business objects and shared interfaces  
Business process choreography overview  
Exercise: Creating a business process, part I  
Business process basic and structured activities  
Exercise: Creating a business process, part II  
Business process handlers, runtime behavior, and clients  
Exercise: Creating a business process, part III  
Business rules  
Exercise: Creating business rules  
Adapters  
Exercise: Implementing WebSphere (JCA) adapters  
Developing mediation services  
Exercise: Creating mediation services, part I  
Mediation primitives  
Exercise: Creating mediation services, part II  
Business Space  
Exercise: Exploring Business Space  
Advanced testing  
Exercise: Using component tests  
IBM Process Center  
Exercise: Bringing the UTE Process Server online  
Exercise: Exploring IBM Process Center  
Advanced Integration services  
Exercise: Implementing Advanced Integration services
