IBM MQ V8 System Administration (using Windows for labs)

CÓDIGO:	DURACIÓN:	Precio:
WM207G	32 Hours (4 días)	€1,750.00

Description

This course is also available as self-paced virtual (e-learning) course *IBM MQ V8 System Administration (Using Windows for Labs)* (ZM207G). This option does not require any travel.

This course is designed to provide technical professionals with the skills needed to administer IBM MQ queue managers on distributed platforms such as Windows 2008 Server and Linux.

For information about other related courses, visit the IBM Training website:

<http://www.ibm.com/training>

Objetivos

- Plan the implementation of IBM MQ
- Install IBM MQ
- Perform basic customization and administration tasks
- Enable a queue manager to exchange messages with another queue manager
- Use a trigger message and a trigger monitor to start an application to process messages
- Implement basic queue manager restart and recovery procedures
- Identify the cause of a problem
- Plan for and implement basic IBM MQ security features
- Use accounting and statistics messages to monitor the activities in an IBM MQ system
- Use IBM MQ sample programs to test queue manager, queue, channel, and client configuration

Público

This intermediate course is designed for technical professionals who require the skills to administer any of the IBM MQ queue managers except IBM MQ for z/OS or IBM MQ for iSeries.

Requisitos Previos

You should:

- Have a basic knowledge of IBM MQ V8 concepts, either through successful completion of *Technical Introduction to IBM MQ* (WM103G) or through equivalent practical experience
- Be familiar with and able to use standard functions within the operating system that is used in the lab exercises
- Have a basic knowledge of TCP/IP

Programa

- Course introduction
- IBM MQ review
- Installing IBM MQ
- Creating a basic configuration
- Exercise: Using commands to create queue managers and queues
- Introduction to IBM MQ Explorer
- Exercise: Using IBM MQ Explorer to create queue managers and queues

- Introduction to the Message Queue Interface (MQI)
- Exercise: Using IBM MQ sample programs to test the configuration
- Implementing trigger messages and monitors
- Exercise: Implementing a trigger monitor
- Message persistence and recovery
- Exercise: Using a media image to restore a queue
- Identifying the cause of problems
- Exercise: Running an IBM MQ trace
- Implementing distributed queuing
- Exercise: Connecting queue managers
- Implementing basic security
- Exercise: Controlling access to IBM MQ
- IBM MQ clients
- Exercise: Connecting an IBM MQ client
- Backing up and restoring IBM MQ object definitions
- Exercise: Backing up and restoring IBM MQ object definitions
- Monitoring and configuring IBM MQ for performance
- Exercise: Monitoring and configuring IBM MQ for performance
- JMS administration overview
- Course summary

Más información

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show: The current GTP list price
The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Fechas Programadas
