IBM Case Foundation (Formerly FileNet BPM) 5.0 - Java API Programming

CODE:	DURÉE:	PRIX H.T.:
F156G	32 Hours (4 Jours)	€2,800.00

Description

This course provides information about Process Java API methods for developing custom applications that access the IBM FileNet P8 Process Engine. In order to practice these skills, you write code using Process Java API and work with a fully functioning IBM Case Foundation system.

Objectifs

- Acquire the knowledge and skills necessary to develop custom applications that access the IBM FileNet P8 Process Engine.

Audience

This intermediate course is for programmers responsible for the design and development of custom Case Foundation applications, and anyone who needs to know the capabilities of the Process Java API.

Prérequis

You should have:

- Basic programming experience in Java-based technologies
- Familiarity with business process management **and** workflow concepts

You should complete:

- *IBM FileNet P8 5.0 Prerequisite Skills using Workplace XT (F1410)*

It is receommended that you have completed:

- *IBM FileNet BPM 5.0: Administration (F1440)*
- *IBM FileNet BPM 5.0: Process Design (F1450)*

Programme

- About IBM Case Foundation
- About Process objects and Process Java API
- How to use Process Java API for the following tasks:
    - Creating a Process Engine session
    - Creating work
    - Finding work
    - Processing work
    - Monitoring work status
    - Using application space, roles and in-baskets

- How to integrate process components
- How to configure email notifications
