F241G 8 Hours (1 day) €700.00

## **Description**

This course is intended to teach the skills that are needed to control timing in workflows. Timing can be controlled through milestones, deadlines, timers, delays, and checkpoints. You work with a functioning IBM FileNet P8 system to perform the lesson exercises.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

### **Objectifs**

- · Add milestones and logging to a workflow
- Establish workflow and step deadlines
- · Control processing times and delays
- · Add checkpoint processing to a workflow
