Description

This course is intended to teach the skills that are needed to control timing in workflows. Timing can be controlled through milestones, deadlines, timers, delays, and checkpoints. You work with a functioning IBM FileNet P8 system to perform the lesson exercises.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

Objectifs

- · Add milestones and logging to a workflow
- Establish workflow and step deadlines
- · Control processing times and delays
- · Add checkpoint processing to a workflow

Audience

This course is intended for Case Foundation and Case Manager application builders, who plan, design, and implement Case Manager and Case Foundation solutions.

Prérequis

Terminology
