IBM Datacap 9.0.1 - Introduction

CODE: **DURÉE:** **PRIX H.T.:**

F251G 8 Hours (1 day) €700.00

Description

This course introduces the Datacap system components, processes, and architecture. You learn how to use Datacap clients to process document batches.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Objectifs

Upon completion of this course, participants will be able to:

- Describe the Datacap Capture process
 - Document Source, Document Transformation, Document Delivery
- Describe the Datacap utilities and clients and which roles would use them.
 - Datacap Navigator, Datacap Desktop, Datacap tmweb client, Datacap FastDoc, and Datacap Studio
- Identify the IBM Datacap configurations and components
 - Single system, Client/Server, Hybrid
 - Centralized and Decentralized
- Work with the Datacap Desktop client
 - Create, process, and monitor document batches
- Work with the Datacap Navigator client
 - Operation, Monitor, and Administrator views
 - Create, process, and monitor document batches
- Work with Datacap Web Client interface (tmweb)
 - Operation, Monitor, and Administrator views

Audience

- Anyone who needs to know the Datacap architecture and Datacap clients
- Administrators who are responsible for configuring and administering Datacap system
- Application Builders who implement data capture solutions using the IBM Datacap software suite

Prérequis

- Recommended: Familiarity with data capture concepts
- Working knowledge of Microsoft Windows operating systems

Programme

Datacap overview

- What is IBM Datacap?
- The three process phases for capturing documents

Role-based Datacap clients

- An overview of Datacap clients for different business roles.

Architecture

- Datacap components
- Deployment Configuration Options
- Datacap Folders for Services and Client code
- Datacap.xml file

Datacap Desktop Client

- Capabilities overview
- Datacap Desktop - Monitor view
- Select applications and tasks, and apply filter in the Monitor view

Application design

- Implementation Guiding Principals
- Steps to design an application
- Analyze and define the requirements
- Application development strategy
- Scan, upload, classify and verify batches
- Datacap administrator view
- User settings
- Accessibility features of Datacap Navigator interface

Introduction to Datacap Navigator

- What is IBM Datacap Navigator?
- Views in Datacap Navigator
- Job Monitor
- Batch processing, Scan, Upload, and Verify
- User settings and Accessibility features

Datacap Web Client (tmweb)

- Datacap Web Client – Operations – Monitor – Administrator - Workflows
- Add Users, Groups and Stations
- Set Privileges and Permissions
- Configure Shortcuts
