IBM Datacap 9.0.1 - Administration

CODE: DURÉE: PRIX H.T.:

F258G 8 Hours (1 day) €700.00

Description

This course shows you how to administer and maintain an IBM Datacap system. Topics: Virtual stations, Queueing of tasks, Disaster recovery, DB2 database configuration, Globalization, and event logs

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

Objectifs

Upon completion of this course, participants will be able to:

- · Create shortcuts for Web Client tasks
- Configure store and queue by options
- · Identify Disaster Recovery concepts
- Migrate Data from Access to DB2 database
- Configure Application Globalization
- · Synchronize Job Monitor and Batch Folders for system maintenance
- Create and configure a Maintenance Manager Application
- Configure Event Logs

Audience

- · Administrators who are responsible for administering and maintaining Datacap system
- Anyone who needs to know the Datacap system administration and maintenance

Prérequis

The following courses or equivalent knowledge are required:

- IBM Datacap 9.0.1: Introduction (F251G)
- Recommended: IBM Datacap 9.0.1: Configuration (F256G)
- Recommended: IBM Datacap 9.0.1: Datacap Navigator Configuration (F257G)

Programme

Create Shortcuts to Web Clients tasks

- · Shortcuts for Datacap Web Client
- Task Shortcut Configuration
- Datacap Web Components

Virtual Stations and Queuing of Tasks

- Understand Queuing of Batches
- Queue by Field Options

- Store Field Option
- Datacap Web Interface for task options

Disaster Recovery

- · Backup and Restore Strategy
- · Backup and Restore for Stateless Servers
- Backup and Restore the Datacap Server
- · Backup the Database Server
- · Backup the File Share

Configure DB2 Server

- Supported Databases
- Database Conversion Prerequisites
- Define the Database Structure
- Migrate the Application & Databases
- Configuring the Application to use the Database

Application Globalization

- · Levels of globalization
- Application level globalization
- Datacap Desktop Translations
- Datacap Navigator Translations
- · Resources.json translation keys
- · Validation ruleset and message

System Maintenance

- Routine maintenance
- Preventive maintenance
- Corrective maintenance

Maintenance manager

- What can Maintenance Manager do and what are its uses?
- Maintenance Manager run methods
- Create a Maintenance Manager application
- Maintenance Manager action categories
- Procedure to auto delete batches

Event Logs

- Identify Logs
- Control log content
- Maintenance Manager actions for logging
- Maintain Event Logs
- Datacap Logs locations
