FIREWALL 10.2: TROUBLESHOOTING (EDU-330)

CODE:	LENGTH:	PRICE:
PAN-330	24 Hours (3 days)	\$2,995.00

Description

Overview

The Palo Alto Networks Firewall 9.1: Troubleshooting course is three days of instructor-led training that will help you:

- Investigate networking issues using firewall tools including the CLI
- Follow proven troubleshooting methodologies specific to individual features
- Analyze advanced logs to resolve various real-life scenarios
- Solve advanced, scenario-based challenges

Objectives

Course Objectives

Successful completion of this three-day, instructor-led course will enhance the participant's understanding of how to troubleshoot the full line of Palo Alto Networks® next-generation firewalls. Participants will receive hands-on opportunities to troubleshoot common problems related to the configuration and operation of the security features of the Palo Alto Networks® PAN-OS® operating system. Completion of this class will help participants develop an in-depth knowledge of how to troubleshoot visibility and control over applications, users, and content.

Audience

Target Audience - Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, Network Engineers, and Support Staff.

Prerequisites

Prerequisites

Participants must complete the Firewall 9.0 Essentials: Configuration and Management (EDU-210) course. Participants must have strong practical knowledge of routing and switching, IP addressing, and network security concepts, and at least six months of on-the-job experience with Palo Alto Networks® firewalls

Programme

- Module 1:
Tools and Resources
- Module 7:
Host-Inbound Traffic
- Module 2:
CLI Primer
- Module 8:
Transit Traffic
- Module 3:
Flow Logic
- Module 9:
SSL Decryption
- Module 4:
Packet Captures
- Module 10:
User-ID
- Module 5:
Flow Basic
- Module 11:
GlobalProtect™
- Module 6:
System Services
- Module 12:
Escalation and RMAs
