FIREWALL 10.2: TROUBLESHOOTING (EDU-330)

CODE:	LENGTH:	PRICE:
PAN-330	24 Hours (3 days)	$2,995.00

Description

Overview
The Palo Alto Networks Firewall 9.1: Troubleshooting course is three days of instructor-led training that will help you:
• Investigate networking issues using firewall
tools including the CLI
• Follow proven troubleshooting methodologies
specific to individual features
• Analyze advanced logs to resolve various
real-life scenarios
• Solve advanced, scenario-based challenges

Objectives

Course Objectives
Successful completion of this three-day, instructor-led course will enhance the participant's understanding of how to troubleshoot the full line of Palo Alto Networks® next-generation firewalls. Participants will receive hands-on opportunities to troubleshoot common problems related to the configuration and operation of the security features of the Palo Alto Networks® PAN-OS® operating system. Completion of this class will help participants develop an in-depth knowledge of how to troubleshoot visibility andcontrol over applications, users, and content.

Audience

Target Audience - Security Engineers, Security Administrators, Security Operations Specialists, Security Analysts, Network Engineers, and Support Staff.

Prerequisites

Prerequisites
Participants must complete the Firewall 9.0 Essentials: Configuration and Management (EDU-210) course. Participants must have strong practical knowledge of routing and switching, IP addressing, and networksecurity concepts, and at least six months of on-the-job
experience with Palo Alto Networks® firewalls

Programme

• Module 1:
Tools and Resources
• Module 7:
Host-Inbound Traffic
• Module 2:
CLI Primer
• Module 8:
Transit Traffic
• Module 3:
Flow Logic
• Module 9:
SSL Decryption
• Module 4:
Packet Captures
• Module 10:
User-ID
• Module 5:
Flow Basic
• Module 11:
GlobalProtect™
• Module 6:
System Services
• Module 12:
Escalation and RMAs
