Model for Predictable Results in IBM Cognos Framework Manager - eLearning

CODE:	DURÉE:	PRIX H.T.:
K01011G	8 Hours	€150.00

Description

This offering teaches IBM Cognos Framework Manager data modelers how to model for predictable results. Participants will learn how to identify query and reporting issues, model virtual star schemas, and work with query subjects and relationships. They will learn how to consolidate metadata, use filters and calculations, and work with time dimensions.

Note: Guided eLearning is a self-paced offering which includes web-based content for self-study and videos (including audio) that demonstrate activities.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Objectifs

Please refer to course overview

Audience

Modelers

Prérequis

- Knowledge of OLAP concepts
- Knowledge of how to identify common data structures, define reporting requirements, and identify data access strategies
- Familiarity with the IBM Cognos Framework Manager user interface and workflow process
- Knowledge of how to create a baseline project

You will have the prerequisite knowledge if you have taken the K01010 Introduction to IBM Cognos Framework Manager course and understood the concepts presented there.

Programme

Model for Predictable Results in IBM Cognos Framework Manager

- Identify query issues
- Identify reporting traps: two facts with no dimension context
- Identify various other reporting traps
- Model virtual star schemas
- Use query subjects
- Modify relationships
- Consolidate metadata using virtual objects
- Create calculations
- Filter data
- Customize metadata for runtime
- Implement a time dimension
- Specify determinants

Informations supplémentaires

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEurl.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Dates de session

Date	Lieu	Time Zone	Langue	Type	Garanti	PRIX H.T.
28 May 2023			English	Web based Training		€150.00
