IBM Stewardship Center for Information Server v11.5

CODE:	LENGTH:	PRICE:
KM618G	8 Hours (1 day)	€780.00

Description

IBM Stewardship Center for Information Server v11.5 provides event notification with workflow and remediation. Business users can be notified and respond to Information Server events, when they occur. These events include data quality exceptions occurring in Information Server products such as DataStage and Information Analyzer. These events also include catalog edits to governance categories and terms occurring within the Information Governance Catalog.

Objectives

Please refer to course overview.

Audience

• Data Stewards and other business users who collaborate to remediate data quality violations. And Data Governance Council Members and other business users who collaborate on defining data policies and rules for their business in addition to monitoring policy compliance.

Prerequisites

Basic knowledge of the Windows operating system and familiarity with database access techniques.

Programme

1. Introduction to Stewardship Center2. Managing Subscriptions with Subscription Manager3. Stewardship Center sample applications4. Managing Data Quality Exceptions in the Data Quality Exceptions Console5. Managing Data Quality Exceptions in the Stewardship Center6. Information Governance Dashboard
