IBM Cognos Command Center Automation Using Plugin Tasks (V10.2)

CODE:	DURÉE:	PRIX H.T.:
P8280G	1.04 Hours	€95.00

Description

IBM Cognos Command Center: Automation Using Plugin Tasks (V10.2) is a one hour vignette that displays many ways in which IBM Cognos Command Center (ICCC) functionality can be extended using plugins. Through demonstration you will learn how to use file utilities and ftp utilities to manipulate and extract information from files, use system utilities to monitor and manage Windows services, and interact with IBM Cognos TM1 processes, chores and other objects.
If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

Objectifs

Please refer to course overview.

Audience

This advanced-level course is for administrator and support personnel who need thorough knowledge of Cognos Command Center Plugin Tasks.

Prérequis

You should have:

- Familiarity with IBM Cognos Command Center

Programme

Preface

- Course overview
- Intended audience
- Course objectives
- Pre-requisites

Installing Plugins

- Plugin directory location
- Steps to load plugins
- Plugin version issues with import/export

Using File Utility Plugin Tasks

- Directories
- Encoding
- Deletion
- Move and copy
- File Compression

- Operations on file data

Using FTP/SFTP Plugin Tasks

- Directories
- Delete
- Get and Put
- Move

Using System Utilities Plugin Tasks

- Check ports
- Get process information and system status
- Windows services

Using TM1 Plugin Tasks

- Configuring the TM1 host computing resource
- Run TurboIntegrator processes and chores
- List server objects and views
- Delete server objects and views

Using Cognos Integration Server Plugin Tasks

- Configuring the IBM Cognos Integration Server host computing resource
- Run selection
- Run selection with command file

Using the Email Plugin Task

- Configuring the email host computing resource
- Send email
