# **Essentials of IBM Rational DOORS Next Generation,** V5.0

CODE: DURÉE: PRIX H.T.:

QN171G 8 Hours (1 day) €700.00

#### **Description**

This course teaches analysts and engineers how to define, elaborate, organize, and manage textual and graphical requirements and requirements-related information in IBM® Rational® DOORS Next Generation.

Ration DOORS Next Generation is a key component of the Rational solution for Collaborative Lifecycle Management (CLM). The product provides requirements definition and management capabilities in a fully-integrated environment that can also include IBM® Rational Team Concert™ for change and configuration management, and IBM® Rational® Quality Manager for quality management.

#### **Objectifs**

After completing this course, you should be able to use IBM® Rational® DOORS Next Generation, part of the IBM jazz based solution for requirements management to:

- View and work with requirements and other artifacts in a collaborative context
- · Create and edit requirements documents and other artifacts, including both textual and graphical artifacts
- · Create, manage, and view traceability relationships between requirements and other artifacts
- Manage requirements throughout a project lifecycle

#### **Audience**

This basic course is for:

- Business Analyst
- Systems Engineer
- Software Engineer
- Requirements Engineer
- Requirements Manager
- · Requirements Team Leader

#### **Prérequis**

There are no pre-requisites for this course.

#### **Programme**

- · View and work with requirements and requirements-related information in a collaborative context
- Capture, define, elaborate, and edit requirements and requirements-related information, and create hierarchically organized requirements documents
- · Create and manage traceability relationships between requirements and requirements- related information
- Manage requirements throughout a project lifecycle
