JUN_JSE	3 (den)	Kč 71,000.00

## Description

Školení je vedeno virtuálně v anglickém jazyce ve školicím středisku Arrow v Anglii.  
Cena školení je 2 375 GBP bez DPH - tato cena bude při fakturaci přepočtena aktuálním kurzem.

This three-day course is designed to provide students with the knowledge required to manage the Junos Space appliance and manage devices with Junos Space.  
Students will understand how to install Junos Space into a multinode Space Fabric, as well as learn how to administer and monitor the Fabric.  
Centralized Junos device management options offered by the Junos Space Network Management Platform will be explored, including configuration backup, synchronization, Junos image distribution, and application of templates.  
Students will also learn how to use Junos Space applications, such as Service Now and Service Insight.  
Through demonstrations and hands-on labs, students will gain experience installing Junos Space into a multinode Space Fabric, navigating the administrative environment, monitoring the Fabric, performing schema updates, and using Junos Space applications.  
This course uses the Junos Space virtual appliance for the hands-on component and is based on Junos Space Release 17.1R1.7.

- Automation
- Network Management

Junos Space Essentials (JSE) is an intermediate level course. Relevant Juniper Product • Junos Space

## Cíle

- Explain the need for Junos Space software.
- Explain Junos Space architecture.
- List and identify the components and applications of Junos Space.
- List the two different form factors available for Junos Space.
- Perform the initial installation of a Junos Space appliance.
- Explain how security is provided to Junos Space.
- Explain how to use the Junos Space GUI.
- Describe how Junos Space manages jobs.
- Demonstrate user role differences within Junos Space.
- Explain how to manage the Junos Space platform.
- Describe how Junos Space discovers and manages devices.
- Edit device configurations.
- List the purposes of network monitoring.
- Work with the monitoring topology section and manage nodes.
- Manage outages.
- Describe the differences between Template Definitions and Templates.
- Create and use templates and template definitions.
- Create Quick Templates.
- Create and deploy CLI Configlets.
- Describe Automated Support and Prevention (ASAP) benefits.
- Explain Service Now application processes.
- Describe the Service Insight platform settings.
- Describe multi-node Junos Space deployment
- Describe the reports function.
- Explain the purpose of report definitions.
- Describe how to generate reports.

## Určeno pro

This course benefits individuals responsible for managing Junos devices using the Junos Space software.

## Vstupní znalosti

Students should have experience with the Junos operating system, including device management, administration, and monitoring. Students should also attend the Introduction to the Junos Operating System (IJOS) course prior to attending this class.

## Program

			Junos Space Deployment
			• Two Form Factors
			• Junos Space Initial Setup
			• Initial Setup of Primary Node
			• Junos Space Security
			• Junos Space GUI
			Lab 1: Deploying Junos Space
			Junos Space Fabric Deployment
			• Fabric Overview
	Introduction to Junos Space		• Fabric Creation
			• FMPM Nodes
	What Is Junos Space?		• High Availability Failover Scenarios
	• Junos Space Architecture		
Day 1 Course Introduction	• Junos Space Applications	Lab 2: Deploying Junos Space Fabric Day 2	
			Junos Space Templates
			• Templates Introduction
			• Template Definitions
			• Template creation and application
			• Quick templates
			• CLI Configlets
Platform Administration	Device Management		
• Job Management	• Discovering and managing devices		
• User Roles	• Device management		
• Application Management	• Device Configuration		
		Lab 3: Administrating the Platform	Lab 4: Network Management Platform
			Lab 5: Creating and Applying Templates
