# IBM BigIntegrate for Data Engineers v11.5.0.2

CODE:	LENGTH:	PRICE:
KM700G	1 days	\$700.00

## Description

Teaches data engineers how to run DataStage jobs in a Hadoop environment. You will run jobs in traditional and YARN mode, access HDFS files and Hive tables using different file formats and connector stages.

## Objectives

Please refer to course overview

## Audience

This course is intended for Analysts and Contributors.

## Prerequisites

- Knowledge of OLAP fundamentals is recommended

## Programme

- Introductions to BigData and BigQuality
- YARN for dynamic DataStage job allocation
- Tracing and debugging in YARN mode
- Using log files
- Understanding configuration parameters
- Accessing Hadoop data using WebHDFS and HttpFS and using various connector stages

## Further Information

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

## Session Dates

On request. Please [contact us](#)

## Additional Information

[This training is also available as onsite training. Please contact us to find out more.](#)
