## Citrix Virtual Apps and Desktops Service on Microsoft Azure

CODE:	LENGTH:	PRICE:
CTX_CXD-251	16 Hours (2 days)	€1,295.00

### Description

Learn to deploy and manage your XenApp and XenDesktop apps and desktops in Microsoft Azure. Gain the skills to plan your machine catalog and virtual machine design based in Microsoft's public cloud and get hands-on practice deploying those machines using Machine Creation Services. You will also learn about additional Azure considerations including maintenance and power management which are critical in a cloud environment. For remote access, you will learn to configure Citrix StoreFront and NetScaler Gateway on the Azure platform.

This course focuses on Microsoft Azure as a Citrix Cloud resource location, however concepts are relevant to both Citrix Cloud and fully managed XenApp and XenDesktop sites. If you are planning to move to Citrix Cloud, it is recommended that you enroll in CXD-252 Moving to the XenApp and XenDesktop Service on Citrix Cloud and Microsoft Azure which includes both Citrix Cloud architecture and administration in addition to the content covered in this course in a 5-day format.

This course is currently based on XenApp and XenDesktop 7.13 components and Citrix Cloud.

### Objectives

After completing this course you should be able to:

- Prepare the Azure environment for secure integration with XenApp and XenDesktop
- Deploy and manage Virtual Delivery Agent machines in Microsoft Azure using Machine Creation Services
- Integrate Citrix Cloud and XenApp/XenDesktop with Microsoft Azure Active Directory
- Design Machine Catalogs and virtual machines on Microsoft Azure Resource Manager
- Provide remote access with Citrix StoreFront and NetScaler Gateway on Microsoft Azure

### Audience

Built for experienced IT Professionals familiar with XenApp and XenDesktop 7.x in an on-premises environment. Potential students include administrators, engineers, and architects designing or deploying XenApp and XenDesktop workloads on Microsoft Azure.

### Prerequisites

Attendees should meet the following prerequisites:

- Experience deploying and managing XenApp and XenDesktop 7.x in on-premises environment.
- Basic knowledge of the Microsoft Azure platform including Virtual machine management, Azure Resource Manager portal, Storage, Networking

### Programme

#### Module 1: XenApp and XenDesktop on Azure Overview

- Defining IAAS
- XenApp and XenDesktop Azure Deployment Models
- Azure Fundamentals Review
- Azure Management
- Azure Locations

#### Module 2: XenApp and XenDesktop

- Integration with Azure Active Directory
- Active Directory Basics
- Active Directory Usage
- Connecting On-premises Active Directory to Azure
- Azure Role Based Access Control

### **Module 3: Connecting to Microsoft Azure**

- Azure Connectivity
- Cloud Connectors in Azure
- Creating XenApp and XenDesktop Host Connections to Azure

### **Module 4: Deploying Apps and Desktops using Machine Creation Services**

- Master Image Preparation
- Machine Creation Services in Azure
- Considerations for Deploying onto Azure

### **Module 5: Providing Access to End Users**

- StoreFront Locations
- NetScaler Locations
- Multiple XenApp and XenDesktop Zones in Azure Regions

### **Module 6: Maintaining Infrastructure and VDAs in Microsoft Azure**

- Maintaining Infrastructure
- Maintaining Resources
- Power Management

### **Module 7: Plan for a Successful POC**

- Planning your next steps

## **Test and Certification**

Recommended as preparation for the following exams:

- There are no exams currently aligned to this course

## **Session Dates**

On request. Please [contact us](#)

## **Additional Information**

[This training is also available as onsite training. Please contact us to find out more.](#)
