IBM Maximo Health, Safety and Environment 7.5.1

CODE:	DURÉE:	PRIX H.T.:
ZL1_TOS66	12 Hours	€450.00

Description

This online, self-paced course introduces you to the features and capabilities of IBM Maximo Health, Safety, and Environment Manager. The content is a structured set of topics that are intended to provide a detailed overview of the solution specific applications and the common business processes and practices associated with the management of health, safety, and environment in the workplace. During this course you learn the function of and the relationships between the applications and their associated business processes through recorded lectures, product demonstrations, and live hands-on labs.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. http://www.ibm.com/training/terms

Objectifs

- Explain the Maximo Asset Management industry solution and product add-on model
- Describe features and function of IBM Maximo Health, Safety, and Environment (HSE) Manager
- Explain what business processes and corresponding practices are supported by Maximo Health, Safety, and Environment Manager
- Define and build key data constructs specific to Maximo Health, Safety, and Environment Manager
- Setup and configure solution specific system options
- Demonstrate an understanding of the basic business rules of each of the applications and how they work together
- Describe the specific applications and business processes managed with Maximo HSE.
- Enter and process event-related records and work-related records to a completed status.

Audience

This intermediate-level course is for IBM customers, technical sales and support specialists, consultants, and Business Partners.
