Tivoli's Process Automation Engine 7.5 Fundamentals

CODE:	DURÉE:	PRIX H.T.:
TR711G	5 Jours	€3,490.00

Description

This course covers elements of Tivoli's process automation engine 7.5 that are common to all products based on the engine. It is the prerequisite for more advanced training on IBM's Service Management products. The course is technical and hands-on in nature. In addition to abstract concepts and use, technical details of the applications and data structures used by IBM Service Management applications are discussed.

Objectifs

- List the components of Tivoli's process automation engine
- Create the foundation data required for Tivoli's process automation engine applications
- Use work management
- Report on Tivoli's Process Automation Engine data
- Customize the engine database configuration and applications
- Automate IBM Service Management applications using workflows
- Use the Integration Framework to import and export data

Audience

This intermediate course is for implementers, deployment and project teams, system administrators, database administrators, and consultants who are new to Tivoli's process automation engine and will be using IBM Service Management products.

Prérequis

There are no prerequisites for this course.

Programme

Tivoli Process Automation Engine overview

- Lesson 1: Overview
- Lesson 2: The IBM Service Management products
- Lesson 3: Basic navigation
- Lesson 4: Start Centers

Components and architecture

- Lesson 1: Architecture and engine components
- Lesson 2: Engine Administrative Workstation directory structure
- Lesson 3: System properties

Foundation Data

- Lesson 1: Engine financial configuration
- Lesson 2: Sites, locations, and systems
- Lesson 3: Classifications

Security

- Lesson 1: System security configuration
- Lesson 2: Groups and system privileges
- Lesson 3: People, users, labor, and crafts
- Lesson 4: Conditional security

Database Architecture

- Lesson 1: Database configuration
- Lesson 2: E-Signature and E-Audit

Work Management

- Lesson 1: Introduction to work management
- Lesson 2: Work orders and job plans
- Lesson 3: Activities, tasks, and automated flow control

Application Customization

- Lesson 1: Managing domains
- Lesson 2: Application Designer
- Lesson 3: Migration Manager

Automation

- Lesson 1: Cron tasks
- Lesson 2: Email, communication templates, and the bulletin board
- Lesson 3: Escalations and actions
- Lesson 4: Scripting interfaces

Workflow

- Lesson 1: Introduction to workflow
- Lesson 2: Workflow administration
- Lesson 3: Workflow design

Reporting

- Lesson 1: Data analysis overview
- Lesson 2: QBEs, KPIs, and predefined reports
- Lesson 3: Adhoc Reports using QBRs
- Lesson 4: Report administration

Integration

- Lesson 1: Integration framework overview
- Lesson 2: Integration framework examples

Troubleshooting

- Lesson 1: Logging and appenders
- Lesson 2: Troubleshooting

Informations supplémentaires

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show: The current GTP list price
The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Dates de session

Sur demande. [Merci de nous contacter](#)
