## VMware AirWatch: Bootcamp

<b>CODE:</b>	<b>LENGTH:</b>	<b>PRICE:</b>
VM-AW-BTCMP-OE	32 Hours (4 days)	\$3,400.00

### Description

This bootcamp is a combination of the AirWatch Enterprise Mobility: Configure and Manage course and the AirWatch Enterprise Mobility: Configure and Deploy Integrated Solutions course. These two courses take you from learning the foundational skills needed to configure and manage your AirWatch environment to advanced operations on the AirWatch platform. You will learn how to enable containerized applications, deploy and manage corporate email, and integrate AirWatch with your enterprise resources.

### Objectives

After completing this course, you should be able to meet the following objectives:

- Enroll devices in your enterprise environment, configure and update device settings over-the-air, and secure a diverse fleet of mobile devices
- Select the email deployment strategy that best fits your business and security requirements
- Manage internal, public, and purchased applications across managed devices
- Enable secure mobile access to content anytime, anywhere while protecting sensitive content
- Gain insight into major platforms, including iOS, Android, and Windows Phone devices
- Configure and provision cloud deployments
- Learn AirWatch best practices for mobile deployments
- Understand how to deploy and manage AirWatch applications from the console
- Integrate with enterprise resources by installing the AirWatch Cloud Connector
- Enable containerized applications to securely connect with back-end resources through use of the AirWatch Tunnel/Mobile Access Gateway
- Deploy and manage corporate email through the use of the AirWatch Secure Email Gateway

### Audience

AirWatch Administrators, Solutions Architects, Solutions Engineers, Sales Engineers, Consultants, Support or Service Desk, Installers or Implementation Specialists
