# IBM MQ V8 Advanced System Administration for z/OS

<b>CODE:</b>	<b>DURÉE:</b>	<b>PRIX H.T.:</b>
WM312G	4 Jours	€2,600.00

## Description

This course focuses on advanced IBM MQ for z/OS skills. After a baseline of IBM MQ topics, the course continues with channel security, the need to use TLS ciphers in response to current security threats, and channel authorization rules. The course also covers queue-sharing groups, queue-sharing group updates, and distributed and intra-group queuing with queue-sharing groups. Other topics include the 8-byte relative byte address and buffers above the 2-GB bar features of IBM MQ V8, the use of IBM MQ accounting and statistics, how to capture and review information to resolve or mitigate performance and capacity problems, and how to create application profiles. Hands-on lab exercises throughout the course reinforce the lectures and provide familiarity with advanced tasks and updated capabilities.

For information about other related courses, visit the IBM Training website: <http://www.ibm.com/training>

## Objectifs

After completing this course, you should be able to:

- Explain how SSL/TLS contributes to authentication and confidentiality
- Describe how to configure SSL/TLS in IBM MQ z/OS queue managers and IBM MQ clients
- Implement SSL/TLS with multiple certificate authority (CA) certificates
- Implement various types of channel authorization rules
- Describe how to configure and manage queue-sharing groups
- Explain how to incorporate shared message data sets and storage class memory to maximize coupling facility storage
- Describe how to add a queue-sharing group to an existing IBM MQ cluster
- Implement 8-byte record byte address and buffers above the 2-GB line
- Describe how to use statistics and accounting capabilities for problem determination, tuning, and capacity planning activities

## Audience

This course is designed for z/OS IBM MQ administrators and other technical professionals who are responsible for IBM MQ security, architecture, availability, and performance-related tasks.

## Prérequis

Before taking this course, you should:

- Successfully complete IBM MQ V8 System Administration for z/OS (WM302G), or have equivalent experience
- Be proficient working with z/OS, or successfully complete Fundamental System Skills in z/OS (ES10G)

## Programme

Course introduction  
IBM MQ baseline  
Exercise: Configuring the IBM MQ lab environment  
Channel security with SSL/TLS  
Exercise: Configuring SSL/TLS for queue managers and channels  
Channel security with channel authentication rules  
Exercise: Configuring channel authentication rules  
Queue-sharing groups  
Exercise: Configuring queue-sharing groups and shared queues  
Intra-group, distributed queuing, and clustering with queue-sharing groups  
Exercise: Intra-group and distributed queuing with queue-sharing groups  
Eight-byte relative byte address (RBA) and buffers above the 2-GB line  
Exercise: Implementing 8-byte relative byte address and buffers above the 2-GB line  
Introduction to IBM MQ for z/OS statistics and accounting  
Exercise: Getting started with IBM MQ statistics and accounting records  
Course summary

## **Informations supplémentaires**

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show: The current GTP list price  
The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

## **Dates de session**

Sur demande. [Merci de nous contacter](#)
