VMware AirWatch: Install and Deploy On Premises Solutions

CODE: LENGTH: PRICE:

VM-AW-ONPREM-OE 8 Hours (1 day) \$925.00

Description

This one-day course is designed to equip students with the skills needed to install, configure, and upgrade an on premise AirWatch server. Students will have access to hands-on labs and learn upgrade options and strategies, as well as how to troubleshoot common installation and upgrade issues. Advanced installation techniques are discussed, including the use of high availability and redundancy.

Objectives

By the end of the course, you should be able to meet the following objectives:

- Identify important installation and upgrade prerequisites
- · Learn to install, configure and upgrade an On-Premise AirWatch server
- Discuss the benefits of utilizing advanced installation techniques, including the use of high availability and enabling redundancy through multi-server configurations
- · Review and recommend appropriate upgrade options and strategies
- · Troubleshoot common installation and upgrade issues

Audience

Airwatch Administrators, IT Staff, Sales Engineers, Consultants, Support or Helpdesk, Solutions Architects, Solutions Engineers, Airwatch Installers or Implementation Specialists

Prerequisites

This course requires completion of the following course:

· AirWatch Enterprise Mobility: Configure and Deploy Integrated Solutions

The VMware AirWatch Professional Accreditation: Enterprise Mobility or the AirWatch Technical Post-Sales Cloud Professional certification is required.

Programme

- 1. Advanced AirWatch Architecture
- 2. Preparing for Installation
- 3. Installing the AirWatch Application
- 4. Installing Reports
- 5. Performing Post-Installation Configuration and Verification
- 6. High Availability and Disaster Recovery Configuration
- 7. Prepare Environment for an Upgrade
- 8. Perform an Upgrade
- 9. Complete Post-Upgrade Environment Verification
- 10. Troubleshoot Common Issues
