Developing Solutions with IBM Decision Server Insights V8.8

CODE:	DURÉE:	PRIX H.T.:
ZB399G	32 Hours	€1,200.00

Description

This course is also available as classroom course *Developing Solutions with IBM Decision Server Insights V8.8* (WB399G). In this course, you learn about the main features of the Decision Server Insights component of IBM Operational Decision Manager Advanced V8.8.

Decision Server Insights enables real-time, in-memory, rule-based, event-driven, and analytical decision making. You experience how to use analytics, time-based reasoning, and location-based reasoning to build a real-world solution that detects and responds to business situations. You also learn the key capabilities of the multi-agent architecture of Decision Server Insights by developing several agents that are bound to a single entity for different purposes.

This course focuses on solution development, deployment, testing, and administration. You learn how to implement the business logic that detects business situations and uses situational context to decide and take the next best action.

The course begins with an overview of the programming model for Decision Server Insights and the architecture for the Decision Server Insights runtime environment. You learn how to design a Decision Server Insights solution, model the business entities and events that you care about, and implement the business logic. You work with a realistic test client to test the behavior of your implementation after deployment.

The course also covers administration topics, including installation, configuration of the Decision Server Insights reference topology, solution deployment in a grid environment, and grid administration.

For information about other related courses, see the IBM Training website: <http://www.ibm.com/training>

Objectifs

After completing this course, you should be able to:

- Describe the Decision Server Insights programming model and architecture
- Design and create a Decision Server Insights solution
- Define the business model for the events, entities, and concepts that are relevant to your domain
- Use global aggregates for calculations across all events or a population of entities
- Implement business logic with rule agents and rules to detect and respond to business situations
- Deploy solutions to the Insight Server runtime and test runtime behavior
- Explain Decision Server Insights integration capabilities

Audience

This course is designed for developers.

Prérequis

Before taking this course, you should have:

- Experience with the Java programming language and object-oriented concepts
- Basic knowledge of Extensible Markup Language (XML)
- Basic knowledge of the WebSphere Application Server Liberty profile
- Familiarity with the Representational State Transfer (REST) architectural style
- Familiarity with WebSphere eXtreme Scale

Programme

Course introduction
 Introducing IBM Decision Server Insights
 Exercise: Getting started with Decision Server Insights
 Designing Decision Server Insights solutions
 Exercise: Creating a solution in Insight Designer
 Creating the business model
 Exercise: Defining the business model
 Authoring the business logic
 Exercise: Creating a rule agent
 Exercise: Writing and testing rules
 Working with aggregates
 Exercise: Using global aggregates in rules
 Exercise: Using event aggregates in rules
 Exercise: Using time-based and location-based reasoning in rules
 Exercise: Testing for the absence of events
 Testing solutions
 Exercise: Testing solutions
 Exercise: Using the Map Viewer
 Modeling and defining connectivity
 Exercise: Defining connectivity
 Integrating Decision Server Insights
 Configuring Insight Server
 Exercise: Installing Decision Server Insights
 Exercise: Configuring Decision Server Insights
 Managing deployment
 Exercise: Deploying solutions
 Administering Decision Server Insights
 Exercise: Administering Decision Server Insights
 Course summary

Informations supplémentaires

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEenrl.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Dates de session

Date	Lieu	Time Zone	Langue	Type	Garanti	PRIX H.T.
04 Jun 2023			Français	Self Paced Training		€1,200.00
