VMware Identity Manager: Deploy and Manage with AirWatch

CODE:	LENGTH:	PRICE:
VM-AW-VIMDMAW-OE	16 Hours (2 days)	$1,700.00

Description

This two-day course focuses on the basic skills that you need to effectively incorporate VMware Identity Manager™ with your existing software-as-a-service implementation of VMware AirWatch®. The course includes a hands-on component in which you will configure VMware Identity Manager to sync with Active Directory and VMware AirWatch. You will gain the necessary skills to effectively manage the VMware Identity Manager console and deploy applications on a conditional basis.

Product Alignment
- VMware AirWatch® Enterprise Mobility Management™ V9.0
- VMware Identity Manager V2.6
- Workspace ONE V2.1

Objectives

By the end of the course, you should be able to meet the following objectives:
- Explain the fundamental capabilities of VMware Identity Manager and VMware Workspace™ ONE™
- Effectively navigate and execute critical tasks in the VMware Identity Manager console
- Enable single sign-on for enterprise applications for iOS
- Install AirWatch Cloud Connector and establish Active Directory integration
- Integrate VMware Identity Manager with VMware AirWatch

Audience

System administrators, mobility administrators, identity-as-a-service administrators, solutions architects, solutions engineers, sales engineers, consultants, installers, and implementation specialists

Prerequisites

Experience with AirWatch Administrative Console

Programme

1 Introduction to Workspace ONE and Architecture
2 VMware Identity Manager Overview
3 Install and Configure the AirWatch Cloud Connector
4 Integrate and Configure Directory Services
5 VMware Identity Manager Console Overview
6 Users and Groups
7 Configure Access Policies
8 Integrate AirWatch with VMware Identity Manager
9 Configure User Authentication with VMware Identity Manager
10 Mobile Application Management Fundamentals
11 AppConfig Community
12 Unified Catalog
Outline:13 Implementing iOS Mobile SSO
