# Design Application Deployment with IBM UrbanCode Deploy

<b>CODE:</b>	<b>DURÉE:</b>	<b>PRIX H.T.:</b>
ZQ410G	8 Hours (1 day)	€300.00

## Description

In this course, you learn how to plan and automate the deployment of applications to test environments with IBM UrbanCode Deploy.

IBM UrbanCode Deploy is a tool for standardizing and simplifying the process of deploying software components to each environment in your development cycle. This is a beginner-level course for new users of IBM UrbanCode Deploy, such as administrators, development teams, and operations leads.

Hands-on exercises use IBM UrbanCode Deploy and cover deploying a simple web application. You create components, create an application that contains those components, and then deploy the components to an environment.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

For information about other related courses, visit the IBM Training website:  
<http://www.ibm.com/training>

## Objectifs

- Describe how IBM UrbanCode Deploy supports the principles and practices of DevOps
- Explain the main concepts and features of IBM UrbanCode Deploy
- Plan and automate the deployment of applications to test environments
- Configure a security model with roles, approvals, and quality statuses and gates

## Audience

This course is designed for new users of IBM UrbanCode Deploy, including administrators, development teams, and operations leads.

## Prérequis

- Basic understanding of client-server architecture
- Basic understanding of multitier application models

## Programme

Introduction to designing software deployment and deploying applications  
Configuring components and component processes  
Defining deployment with resources, environments, and application processes  
Deploying applications to target environments  
Setting up server security, approvals, and quality gates

## Informations supplémentaires

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EVITA system for requesting external training should use that same process for this course. Go to the EVITA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEurl.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

## Dates de session

Date	Lieu	Time Zone	Langue	Type	Garanti	PRIX H.T.
28 Jan 2023			English	Self Paced Training		€300.00
