Architecting with Google Cloud Platform: Design and Process

CODE:	LENGTH:	PRICE:
GOG_ADP	16 Hours (2 days)	Request Price

Description

This two-day instructor-led class equips you to build highly reliable and efficient solutions on Google Cloud Platform. It is a continuation of the Architecting with Google Cloud Platform: Infrastructure course and assumes hands-on experience with the technologies covered in that course. Through a combination of presentations, demos, and hands-on labs, you will learn to design GCP deployments that are highly reliable and secure as well as how to operate GCP deployments in a highly available and cost-effective manner.

Audience

Cloud solutions architects
Site Reliability Engineers
Systems operations professionals
DevOps engineers
IT managers

Individuals using Google Cloud Platform to create new solutions or to integrate existing systems, application environments, and infrastructure with the Google Cloud Platform

Prerequisites

Completion of Architecting with Google Cloud Platform: Infrastructure (#5973) or have equivalent experience
Basic proficiency with command-line tools and Linux operating system environments
Systems operations experience including deploying and managing applications, either on-premises or in a public cloud environment

Programme

Design for high availability, scalability, and maintainability
Assess tradeoffs and make sound choices among Google Cloud Platform products
Integrate on-premises and cloud resources
Identify ways to optimize resources and minimize cost
Implement processes that minimize downtime, such as monitoring and alarming, unit and integration testing, production resilience testing, and incident post-mortem analysis
Implement policies that minimize security risks, such as auditing, separation of duties and least privilege
Implement technologies and processes that assure business continuity in the event of a disaster

Session Dates
