VMware Carbon Black Cloud Audit and Remediation

CODE:	LENGTH:	PRICE:
VM-CB-CAR	8 Hours (1 day)	\$925.00

Description

This one-day course teaches you how to use the VMware Carbon Black® Cloud Audit and Remediation™ product to build queries for IT hygiene, incident response, and vulnerability assessment to support your organization's security posture and policies. This course provides an in-depth, technical understanding of the product through comprehensive coursework and hands-on scenario-based labs.

Product Alignment

- VMware Carbon Black Cloud Audit and Remediation
- VMware Carbon Black Cloud Endpoint™ Advanced
- VMware Carbon Black Cloud Endpoint™ Enterprise

Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the components and capabilities of VMware Carbon Black Cloud Audit and Remediation
- Identify the architecture and data flows for Carbon Black Cloud Audit and Remediation communication
- Describe the use case and functionality of recommended queries
- Achieve a basic knowledge of SQL
- Describe the elements of a SQL query
- Evaluate the filtering options for queries
- Perform basic SQL queries on endpoints
- Describe the different response capabilities available from VMware Carbon Black Cloud

Audience

System administrators and security operations personnel, including analysts and managers

Prerequisites

This course requires completion of the following course:

- VMware Carbon Black Cloud Fundamentals

Programme

1 Course Introduction	2 Data Flows and Communication	3 Query Basics
• Introductions and course logistics	• Hardware and software requirements	• osquery
• Course objectives	• Architecture	• Available tables
	• Data flows	• Query scope
	5 SQL Basics	• Running versus scheduling
	• Components	
4 Recommended Queries	• Select statements	6 Filtering Results
• Use cases	• Where clause	• Query creation
• Inspecting the SQL query	• Creating basic queries	• Running queries
8 Advanced Search Capabilities	• Exporting and filtering	• Viewing results
• Advanced SQL options	9 Response Capabilities	
• Threat hunting	• Using live response
