IBM Rational CLM for Developers v6.0.5(IBM Engineering Lifecycle Management)

CODE:	LENGTH:	PRICE:
ODC8030G	12 Hours	kr 3,240.00

Description

Please note : *As of version 6.0.6*

- *IBM Rational DOORS Next Generation (RDNG) has been renamed to IBM Engineering Requirements Management DOORS Next (DOORS Next)*
- *IBM Rational Team Concer (RTC) has been renamed to IBM Engineering Workflow Management (EWM)*
- *IBM Rational Quality Manager (RQM) has been renamed to IBM Engineering Test Management (ETM)*

This course bundle provides access to self-paced training pulled from the DOORS Next Generation, Rational Team Concert, and Rational Quality Manager courses. This bundle is designed to provide developers with the necessary skills to navigate and understand common components of the CLM platform appropriate for this role. It provides: (1) full suite of modules from our 1-day RTC for Developers course, (2) key modules from our DOORS Next Generation course, and (3) Rational Quality Manager course. This course contains interactive lessons that focus on skill growth. The course also contains exercises mirroring the instructor-led version and are performed in a simulated environment that does not require connection or access to a live system which provides extreme flexibility in taking the course.

Objectives

- Explain the IBM Rational Collaborative Lifecycle Management (CLM) approach
- Essentials of DOORS Next Generation
- Organizing requirements
- Accept an invitation to join a Rational Team Concert project team
- Find, create, and manage work items in Rational Team Concert
- Make changes to components under Rational Team Concert source control
- Create builds in Rational Team Concert
- Testing and RQM

Audience

This course is for: Software Developers

Prerequisites

- Understand basic software development principles
- A working knowledge of the Eclipse Workbench
- Experience working with Microsoft® Windows®

Programme

CLM and RTC OverviewIntroduction to DNGEssentials of DNGOrganizing RequirementsOrganizing Requirements Simulation Managing Work Items in the Eclipse ClientVersion Control in RTCManaging Work ItemsWorking with Jazz Source Control Perform Work in RTCWorking with BuildsPerforming a BuildEssentials of RQM
