# dashDB SQL for Functions, Grouping, Union, Subqueries and Updates

CODE:	LENGTH:	PRICE:
K04003G	8 Hours	£230.00

## Description

This course teaches developers, database administrators, and system programmers various features of SQL, including column functions, grouping, unions, subqueries, and maintaining data.

**Note:** Guided eLearning is a self-paced offering which includes web-based content for self-study and videos (including audio) that demonstrate activities.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

## Objectives

Please refer to course overview

## Audience

Developers, Database Administrators, System Programmers

## Prerequisites

dashDB SQL for Basic Queries or equivalent experience or knowledge

## Programme

1. dashDB environment  
2. Column functions and grouping SQL functions Beware of NULLs GROUP BY and HAVING Important rule for column functions Restrictions Conceptual execution of a SELECT SQL challenges SQL challenges - solutions  
3. UNION Single report UNION rules UNION vs UNION ALL SQL challenges SQL challenges - solutions  
4. Using subqueries Subqueries Subquery predicates Restrictions and reminders SQL challenges SQL challenges - solutions  
5. Maintaining data Working data Views Working with the data Prototyping change SQL with a unit of work Reminders SQL challenges SQL challenges - solutions

## Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
24 Apr 2024			English	Web based Training		£230.00
