Microsoft Azure Security Technologies

CÓDIGO:	DURACIÓN:	Precio:
MCS_AZ500	40 Hours (5 días)	€950.00

Description

In this course students will gain the knowledge and skills needed to implement security controls, maintain the security posture, and identify and remediate vulnerabilities by using a variety of security tools. The course covers scripting and automation, virtualization, and cloud N-tier architecture.

Objetivos

After completing this course, students will be able to:

- Describe specialized data classifications on Azure
- Identify Azure data protection mechanisms
- Implement Azure data encryption methods
- Secure Internet protocols and how to implement them on Azure
- Describe Azure security services and features

Público

Students should have at least one year of hands-on experience securing Azure workloads and experience with security controls for workloads on Azure.

Requisitos Previos

Before attending this course, students must have knowledge of:

- Microsoft Azure Administrator Associate

Programa

Lessons

- Configure Azure Active Directory for Azure workloads and subscriptions
- Configure Azure AD Privileged Identity Management

Module 1: Identity and Access•Configure security for an Azure subscription

Lessons

- Understand cloud security
- Build a network
- Secure network
- Implement host security
- Implement platform security

Module 2: Platform Protection•Implement subscription securityModule 3: Security Operations

Lessons

- Configure security services
- Configure security policies by using Azure Security Center
- Manage security alerts
- Respond to and remediate security issues
- Create security baselines

Module 4: Data and applications

Lessons

- Configure security policies to manage data
- Configure security for data infrastructure
- Configure encryption for data at rest
- Understand application security
- Implement security for application lifecycle
- Secure applications
- Configure and manage Azure Key Vault
