# IBM MQ V9 System Administration (using Windows for labs)

CODE:	LENGTH:	PRICE:
ZM153G	4 days	\$1,200.00

## Description

This course provides technical professionals with the skills that are needed to administer IBM MQ queue managers on distributed operating systems and in the Cloud. In addition to the instructor-led lectures, you participate in hands-on lab exercises that are designed to reinforce lecture content. The lab exercises use IBM MQ V9.0, giving you practical experience with tasks such as handling queue recovery, implementing security, and problem determination.

**Note:** This course does not cover any of the features of MQ for z/OS or MQ for IBM i.

For information about other related courses, see the IBM Training website: <http://www.ibm.com/training>

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

**IBM Customers and Sellers: If you are interested in this course, consider purchasing it as part of one of these Individual or Enterprise Subscriptions:**

- IBM Learning for Automation Individual Subscription ([SUBR021G](#))
- IBM Learning for Automation Enterprise Subscription ([SUBR005G](#))
- IBM Learning Individual Subscription with Red Hat Learning Services ([SUBR023G](#))

## Objectives

After completing this course, you should be able to:

- Describe the IBM MQ deployment options
- Plan for the implementation of IBM MQ on-premises or in the Cloud
- Use IBM MQ commands and the IBM MQ Explorer to create and manage queue managers, queues, and channels
- Use the IBM MQ sample programs and utilities to test the IBM MQ network
- Enable a queue manager to exchange messages with another queue manager
- Configure client connections to a queue manager
- Use a trigger message and a trigger monitor to start an application to process messages
- Implement basic queue manager restart and recovery procedures
- Use IBM MQ troubleshooting tools to identify the cause of a problem in the IBM MQ network
- Plan for and implement basic IBM MQ security features
- Use accounting and statistics messages to monitor the activities of an IBM MQ system
- Define and administer a simple queue manager cluster

## Audience

This course is designed for technical professionals who require the skills to administer IBM MQ queue managers on distributed operating systems, in the Cloud, or on the IBM MQ Appliance.

## Prerequisites

- Basic knowledge of IBM MQ V9 concepts and features, obtained either through experience or by successfully completing Technical Introduction to IBM MQ (WM103G) or Technical Introduction to IBM MQ (ZM103G)
- Ability to invoke standard functions within the operating system that is used in the lab exercises

- Some knowledge of TCP/IP configuration

## Programme

Course introduction  
 IBM MQ review  
 IBM MQ installation and deployment options  
 Creating a queue manager and queues  
 Exercise: Using commands to create a queue manager and queues  
 Introduction to IBM MQ Explorer  
 Exercise: Using IBM MQ Explorer to create queue managers and queues  
 Testing the IBM MQ implementation  
 Exercise: Using IBM MQ sample programs to test the configuration  
 Implementing distributed queuing  
 Exercise: Connecting queue managers  
 IBM MQ clients  
 Exercise: Connecting an IBM MQ client  
 Implementing trigger messages and monitors  
 Exercise: Implementing a trigger monitor  
 Diagnosing problems  
 Exercise: Running an IBM MQ trace  
 Implementing basic security in IBM MQ  
 Exercise: Controlling access to IBM MQ  
 Backing up and restoring IBM MQ messages and object definitions  
 Exercise: Using a media image to restore a queue  
 Exercise: Backing up and restoring IBM MQ object definitions  
 Introduction to queue manager clusters  
 Exercise: Implementing a basic cluster  
 Monitoring and configuring IBM MQ for performance  
 Exercise: Monitoring IBM MQ for performance  
 Course summary

## Further Information

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process:

<http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

## Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
09 Aug 2022			English	Self Paced Training		\$1,200.00

## Additional Information

[This training is also available as onsite training. Please contact us to find out more.](#)
