Maximo 7.6 Workflows

CODE:	LENGTH:	PRICE:
W0103G	6 Hours	Free

Description

This course discusses the automation of business process within the asset management disciplines using Maximo. The course discusses the creation and management of workflows to include each workflow node and supporting artifacts such as roles, actions, and escalations. The module contains twelve simulations. You must complete the first eleven simulations before the final simulation becomes available. Completion of the simulation means passing the quiz given at the end of each simulation. The course is delivered via interactive simulations where you have an opportunity to learn and potentially interact with the system while we lead you through the functionality. At the end you can test your knowledge by completing the short quizzes. These simulations may aid you in preparing for certification on the product.

Objectives

Simulation 1: Introduction to Workflows is marked completeSimulation 2: Introduction to Workflow Designer is marked complete
Simulation 3: Roles in Workflow is marked completeSimulation 4: Actions in Workflow is marked complete
Simulation 5: Workflow Administration is marked completeSimulation 6: Interaction Node is marked complete
Simulation 7: Wait Node is marked completeSimulation 8: Sub-Process Nodes is marked complete
Simulation 9: Task Nodes is marked completeSimulation 10: Condition Nodes is marked complete
Simulation 11: Manual Input Nodes is marked completeSimulation 12: Workflow Creation is marked complete

Audience

Consultants, System Administrators, Support, Technical Sales
