Maximo 7.6 Domains and Lookups

CODE: **LENGTH:** **PRICE:**

W0105G 3.04 Hours Free

Description

This course examines field validation, synonym values, lookups, and other domains (such as ALN, Numeric, Table and Crossover domains) that are used to maintain or enforce data integrity and provide customer specific values for the various asset management disciplines using Maximo. The course is delivered via interactive simulations where you have an opportunity to learn and potentially interact with the system while we lead you through the functionality. At the end you can test your knowledge by completing the short quizzes. These simulations may aid you in preparing for certification on the product.

Objectives

Simulation 1: Introduction to Domains and Lookups is marked complete
Simulation 2: Creating New Lookups is marked complete
Simulation 3: Creating New ALN Domains is marked complete
Simulation 4: Creating Numeric Domains is marked complete
Simulation 5: Creating Table Domains is marked complete
Simulation 6: Creating Crossover Domains is marked complete
