## Maximo 7.6 Managing Items in Inventory

**CODE:**      **LENGTH:**      **PRICE:**

W0108G      3.04 Hours      Free

### Description

In this course you will learn the basic Inventory Applications that enable you to create items that will be ordered through various vendors, how to setup various units of measure that determine quantities that are ordered and issued, how to use commodity codes to classify items so they can easily be found by users, what rotating and non-rotating items are and their differences between rotating and non-rotating items, setting up condition enabled items and finally setting up tools that are used to complete work. There are nine (9) simulations in this module.

### Objectives

Simulation 1: Inventory Records and Applications is marked complete  
Simulation 2: Item Master Application is marked complete  
Simulation 3: Units of Measure and Conversion Factors is marked complete  
Simulation 4: Commodity Codes is marked complete  
Simulation 5: Rotating Items is marked complete  
Simulation 6: Non-Rotating Items is marked complete  
Simulation 7: Item Assembly Structures is marked complete  
Simulation 8: Condition Codes is marked complete  
Simulation 9: Tools and Stocked Tools is marked complete

### Audience

Consultants, System Administrators, Support, Technical Sales

### Prerequisites
