Securing Citrix Networking and Mobility Solutions

CODE:	LENGTH:	PRICE:
CTX-271	24 Hours (3 days)	\$3,000.00

Description

Learn to secure your networking and mobility deployments with this three-day course that covers NetScaler, XenMobile and ShareFile.

You'll explore networking security fundamentals and learn about various network attacks, such as SSL exploits and how to protect your network against them.

Understand how authentication, authorization, and auditing plays a role in both your networking and mobility environment, and how to augment security with multi-factor authentication.

Take a look at certificates, policies, and the many management options for your deployments to lockdown your data with AppFirewall, and Secure XenMobile applications, and Citrix ShareFile.

Objectives

- Identify network attacks and learn how to protect your network and mobile environment
- Understand authentication, authorization, and auditing as pertaining to NetScaler, XenMobile, and ShareFile

What you'll learn: • Identify device security options available for your mobile environment to protect applications and data

Audience

Is this course for you? Built for IT Professionals working with previous NetScaler, XenMobile, and ShareFile experience.

Potential students include:
