Associate Administrator of IBM Cloud Pak for Data: Learning Path Overview

CODE: **DURÉE:** **PRIX H.T.:**

ZL1_6XB100 1.04 Hours Gratuit

Description

The role of administrator is critical to keep the Cloud Pak for Data environment running. This is the one who installs the application, configures it, loads data into it, tunes it, upgrades it, and in case of errors, investigates, and troubleshoots them. This course is an introduction into the beginner-level path which is one of three learning paths designed for administrators of Cloud Pak for Data. In this part, you will find information about courses that are gathered under this learning path, and you will get familiar with the business scenarios that will be discussed in detail throughout the whole learning path.
