Check Point Certified Security Administrator (CCSA) R80.40

Kod:	Czas trwania:	Cena netto:
CKT_CCSA_R80.X	24 Hours (3 days)	zł5,100.00

Description

This 3-day course covers everything you need to start-up, configure and manage daily operations of Check Point Security Gateway and Management Software Blades systems on the GAiA operating system.

Goals: Learn basic concepts and develop skills necessary to administer IT security fundamental tasks.

Cel szkolenia

Know how to perform periodic administrator tasks
Describe the basic functions of the Gaia operating system
Recognize SmartConsole features, functions, and tools
Describe the Check Point Firewall infrastructure
Understand how SmartConsole is used by administrators to grant permissions and user access
Learn how Check Point security solutions and products work and how they protect networks
Understand licensing and contract requirements for Check Point security products
Describe the essential elements of a Security Policy
Understand the Check Point policy layer concept
Understand how to enable the Application Control and URL Filtering software blades to block access to various applications
Describe how to configure manual and automatic NAT
Identify tools designed to monitor data, determine threats and recognize opportunities for performance improvements
Identify SmartEvent components used to store network activity logs and identify events
Know how Site-to-Site and Remote Access VPN deployments and communities work
Explain the basic concepts of ClusterXL technology and its advantages

Uczestnicy

Technical professionals who support, install deploy or administer Check Point products.

Wymagania wstępne

-Basic knowledge of networking
-6 months to 1 year of experience with Check Point products recommended

Program szkolenia

Security Architecture	Identify key components and configurations
Admin Operations	Create and confirm administrator users for the domain
Deployment	Validate existing licenses for products installed on your network
Licensing	Create and modify Check Point Rule Base objects
Gaia Portal	Demonstrate how to share a layer between Security Policies
Hide/Static NAT	Analyze network traffic and use traffic visibility tools
Firewall Basics	Monitor Management Server States using SmartConsole
Monitoring States	Demonstrate how to run specific SmartEvent reports
ClusterXL	Configure a SmartEvent server to monitor relevant patterns
Traffic Visibility	Configure and deploy a site-to-site VPN
Security Events	Configure and test ClusterXL with a High Availability configuration
Compliance Tasks	Understand how to use CPView to gather gateway information
Threat Detection	Perform periodic tasks as specified in administrator job descriptions
Policy Layers	Test VPN connection and analyze the tunnel traffic
Site-to-Site VPN	Demonstrate how to create custom reports
Remote Access VPN	Demonstrate how to configure event Alerts in SmartEvent
Topics: User Access	Exercises: Utilize various traffic visibility tools to maintain Check Point logs
