Description

This 2-day course provides will help you learn basic concepts and develop skills necessary to administer Check Point CloudGuard security solutions.

Cel szkolenia

Explain the nature of the cloud environment
Describe the five pillars of cloud architecture
Explain the fundamentals of cloud infrastructure
Explain the fundamentals of cloud automation
Explain Check Point Security Management and how it applies to CloudGuard
Describe CloudGuard Security Gateway offerings
Describe cloud load balancers
Explain CloudGuard licensing
Explain the different deployment options and architectures for CloudGuard
Explain how and why CloudGuard is automated
Describe the functions of CloudGuard that can be automated
Describe the tools used to automate CloudGuard
Explain CloudGuard automation requirements
Explain basic troubleshooting techniques specific to Check Point Security Management Servers and Security Gateways
Describe the steps for troubleshooting CloudGuard Network Installation
Explain the tools and techniques used to troubleshoot CloudGuard Network Automation
Explain the need for Cloud Security Posture Management
Describe the posture management tools available in CloudGuard
Explain methods for correcting Cloud Security Posture Management issues

Uczestnicy

Technical professionals who support, install, deploy, or administer Check Point products in cloud environments.

Wymagania wstępne

Working knowledge of Cloud Native Deployment using Microsoft Azure and Amazon Web Services, TCP/IP Networking, and Check Point security products.
Check Point recommends that students who wish to expand their knowledge participate in the CCSA and CCSE courses beforehand.

Program szkolenia

Topics:

- Introduction to Cloud Security
  Introducing CloudGuard
  CloudGuard Architectures
  CloudGuard Security Policy
  CloudGuard Automation
  CloudGuard Troubleshooting
  Introduction to Cloud Security Posture Management

Exercises:

- Deploy a Security Management Server in the cloud
  Install a Security Gateway image
  Create virtual networks
  Deploy internal and external load balancers
  Deploy a Security Gateway using templates
  Assign public IP addresses to cloud devices
  Create web servers in the cloud
  Configure North-South traffic policy
  Configure East-West traffic policy and routes
  Troubleshoot North-South traffic issues
  Troubleshoot East-West traffic issues
