€ CHECK POINT Check Point Certified Cloud Specialist (CCCS)

Kod: Czas trwania: Cena netto:

CKT CCCS R81.X 16 Hours (2 days) zł5.100.00

Description

This 2-day course provides will help you learn basic concepts and develop skills necessary to administer Check Point CloudGuard security solutions.

Cel szkolenia

Explain the nature of the cloud environment

Describe the five pillars of cloud architecture

Explain the fundamentals of cloud infrastructure

Explain the fundamentals of cloud automation

Explain Check Point Security Management and how it applies to CloudGuard

Describe CloudGuard Security Gateway offerings

Describe cloud load balancers

Explain CloudGuard licensing

Explain the different deployment options and architectures for CloudGuard

Explain how and why CloudGuard is automated

Describe the functions of CloudGuard that can be automated

Describe the tools used to automate CloudGuard

Explain CloudGuard automation requirements

Explain basic troubleshooting techniques specific to Check Point Security Management Servers and Security Gateways

Describe the steps for troubleshooting CloudGuard Network Installation

Explain the tools and techniques used to troubleshoot CloudGuard Network Automation

Explain the need for Cloud Security Posture Management

Describe the posture management tools available in CloudGuard

Explain methods for correcting Cloud Security Posture Management issues

Uczestnicy

Technical professionals who support, install, deploy, or administer Check Point products in cloud environments.

Wymagania wstępne

Working knowledge of Cloud Native Deployment using Microsoft Azure and Amazon Web Services, TCP/IP Networking, and Check Point security products.

Check Point recommends that students who wish to expand their knowledge participate in the CCSA and CCSE courses beforehand.

Program szkolenia

Topics:

 Introduction to Cloud Security Introducing CloudGuard CloudGuard Architectures CloudGuard Security Policy CloudGuard Automation CloudGuard Troubleshooting Introduction to Cloud Security Posture Management

Exercises:

 Deploy a Security Management Server in the cloud Install a Security Gateway image
Create virtual networks
Deploy internal and external load balancers
Deploy a Security Gateway using templates
Assign public IP addresses to cloud devices
Create web servers in the cloud
Configure North-South traffic policy
Configure East-West traffic policy and routes
Troubleshoot North-South traffic issues
Troubleshoot East-West traffic issues
