# Check Point and Microsoft Cloud-Bundle

| CODE: | LENGTH: | PRICE: |
|---|---|---|
| MCS_CVBCP | 56 Hours (7 days) | kr39,000.00 |

## Description

This bundle contains the following vendor-courses:

**CKT_CCSA_R80.X - Check Point Security Administrator R80.20 & AZ-103: Microsoft Azure Administrator.**
The course will run over two weeks. Weekend is not included in the days.

## Programme

**Content of CKT_CCSA_R80.X:**

• Provide an understanding of basic concepts and skills necessary to configure Check Point Security Gateway and Management Software Blades.
• Interpret the concept of a Firewall and understand the mechanisms used for controlling network traffic.
• Describe the key elements of Check Point's unified Security Management Architecture.
• Recognize SmartConsole features, functions and tools.
• Understand Check Point deployment options.
• Describe the basic functions of Gaia.
• Describe the essential elements of a Security Policy.
• Understand how traffic inspection takes place in a unified Security Policy.
• Summarize how administration roles and permissions assist in managing policy.
• Recall how to implement backup techniques.
• Understand the Check Point policy layer concept.
• Recognize Check Point security solutions and products and how they work to protect your network.
• Understand licensing and contract requirements for Check Point security products.
• Identify tools designed to monitor data, determine threats and recognize performance improvements.
• Identify tools designed to respond quickly and efficiently to changes in gateways, tunnels, remote users, traffic flow patterns, and other activities.
• Understand Site-to-Site and Remote Access VPN deployments and communities.
• Understand how to analyze and interpret VPN traffic.
• Recognize how to define users and user groups.
• Understand how to manage user access for internal and external users.
• Understand the basic concepts of ClusterXL technology and its advantages.
• Understand how to perform periodic administrator tasks as specified in administrator job descriptions.

**Content of AZ-103:**

• Azure Administration
• Azure Virtual Machines
• Azure Storage
• Virtual Networking
• Intersite Connectivity
• Monitoring
• Data Protection
• Network Traffic Management
• Azure Active Directory
• Securing Identities
• Governance and Compliance
• Data Services

## Test and Certification

**Check Point:**
This course prepares for the certification „Check Point Certified Security Administrator“ (CCSA).

( Exam: 156-215.80).

**Microsoft:**
Recommended course to prepare for the certification: “Microsoft Certified Azure Administrator Associate” (MCAAA)

(Exam AZ-103).
Appropriate exam vouchers will be delivered to each course.

## Further Information

Our bundle contains the following benefits:
• E-BOOK – official digital courseware for both courses
• 2 exam voucher
• Please consider that this bundle consists of two separate vendor courses (CKT_CCSA_R80.X & MCS_AZ103).

## Session Dates
