Citrix Virtual Apps and Desktops 7, App Layering and WEM Administration (Fast Track)

CODE:	LENGTH:	PRICE:
CTX-CMB-318	5 days	\$6,000.00

Description

This accelerated 5-day course is designed for experienced IT professionals to build the foundational administration aspects of installing, configuring and managing a Citrix Virtual Apps and Desktops 7 environment. Learn about configuring policies, printing and basic security features as well as more advanced topics including Windows Environment Management (WEM) and App Layering. Gain an understanding of the solution architecture and communications, and the factors that contribute to a successful deployment. Also, learn how to monitor and troubleshoot the environment with a Citrix Director and Citrix Analytics.

Objectives

How to install, configure, and manage a Citrix Virtual Apps and Desktops 7 site on-premises and on Citrix Cloud
 How to configure Workspace Environment Management to improve the end user environment and virtual resource consumption
 App Layering skills to create and administer OS, platform, application, elastic and user layers

Audience

Built for experienced IT Professionals new to Citrix Virtual Apps and Desktops 7 in an on-prem or Citrix Cloud environment looking to gain as much information as possible in the 5-day course. In this course, you will learn the considerations and how-to setup a new Citrix Virtual Apps and Desktop site including advanced topics as WEM and App Layering allowing fast-track preparation for the CCP-V certification.

Prerequisites

This course is taught at a much faster pace and experience with previous versions is recommended. Previous knowledge of legacy versions of Citrix Virtual Apps or Citrix Virtual Desktops is also beneficial due to the faster pace of this course.

Programme

- Introduction to Citrix Virtual Apps and Desktops
 - Architecture Overview
 - Features
 - Hosting Platform Considerations
 - Citrix Virtual Apps and Desktops Service
 - Connection Flow Process Introduction
- Module 1: Architecture Overview
- Pre-Deployment Considerations
 - Citrix Licensing Setup
 - Delivery Controller Setup
 - Site Setup and Management
 - Redundancy Considerations
- Module 2: Deploy the Site
- Consider Master Image Creation Methods
 - Master Image Requirements
- Module 3: The Apps and Desktops Images
- Learning Objectives
 - Machine Catalogs and Delivery Groups
 - Provisioning Methods and Considerations
 - Machine Creation Services (MCS) Deep Dive
 - MCS Environment Considerations
- Module 4: Provision and Deliver App and Desktop Resources
- Resource Locations
 - Consider Workspace Experience versus StoreFront
- Module 5: Provide Access to App and Desktop Resources
- Workspace App
- Module 6: Manage the User Experience
- Methods to Manage the User Experience

- Published App Properties
 - Server OS Published App Optimizations
 - Published App Presentation
 - Application Groups
- Module 7: Published App and Desktop Presentation and Management
- Apps and Desktops Presentation
 - Map Printers to the User Session
 - Printer Drivers
- Module 8: Manage Printing for User Sessions
- Introduction and Considerations
 - Configure Citrix Profile Management
- Module 9: Citrix Profile Management
- Delegated Administration
 - Power Management Considerations
 - Citrix Admin Security Considerations
 - XML Service Security Considerations
- Module 10: Manage the Site
- Secure HDX External Traffic
- Module 11: Citrix Virtual Apps and Desktops Basic Security Considerations
- Citrix Director Introduction
 - Monitor and Interact with User Sessions
 - Published Apps Analysis
 - Monitor the Machines Running the VDA
- Module 12: Monitor the Site
- Alerts and Notifications
- Module 13: Introduction to Supporting and Troubleshooting Citrix Virtual Apps and Desktops
- Introduction to Supporting a Citrix Virtual Apps and Desktops Site
 - Tools
 - Migration Considerations
 - Citrix Cloud Connector Deployment
 - Citrix Virtual Apps and Desktops with an On-Premises Resource Location
 - The Migration Process
 - Citrix Analytics Introduction
 - Types of Analytics
- Module 14: Migrate to Citrix Cloud
- Module 15: Citrix Analytics
- App Layering Introduction
 - Architecture and How it Works
- Module 16: Introduction to App Layering
- Module 17: Create an OS Layer
- The OS Layer
- Module 18: Create a Platform Layer
- The Platform Layer
 - Elastic App Layering
- Module 19: Create App Layers
- The App Layers
- Module 20: Create Elastic App and User Layers
- User Layers
- Module 21: Deploy a Layered Image using Citrix Virtual Apps and Desktops
- Using Templates in App Layering
 - Using Layered Images in a Citrix Virtual Apps and Desktops Site
- Module 22: Explore Layer Priority and Maintain an App Layering Environment
- Layer Priority
 - Updating Layers
 - Maintaining and Updating the App Layering Environment
 - Common App Layering Considerations and Additional Resources
- Module 23: Introduction to Workspace Environment Management (WEM)
- Workspace Environment Management (WEM) Introduction
 - WEM Administration
 - Managing User Resources with WEM
 - Managing Profiles with WEM
 - Managing Endpoints with the WEM Transformer Feature
 - Learning Objectives
 - Optimizing Machine Performance with WEM
 - Optimizing User Experience with WEM
- Module 24: Use WEM to Centralize Environment Management
- Module 25: Use WEM for Performance Optimization

Test and Certification

This course covers CCA-V and CCP-V certification material.
