VMW_NSXTIS31	40 Hours (5 DENNÍ)	Kč bez DPH 52,000.00

Description

Cena kurzu je 1 880 EUR a bude přepočtena aktuálním kurzem poslední den školení.

Na tomto pětidenním praktickém školení vám předáme znalosti, dovednosti a nástroje k dosažení kompetencí při konfiguraci, provozu a řešení potíží s VMware NSX-T™ Data Center intrinsic security. V tomto kurzu se seznámíte se všemi bezpečnostními funkcemi v NSX-T Data Center, včetně "distributed firewall", Intrusion Detection a Prevention (IDS/IPS), VMware NSX® Intelligence™ a Network Detection and Response (NDR).

Kromě toho vám představíme běžné problémy s konfigurací a metodiku na vyřešení.

Product Alignment

- VMware NSX-T Data Center 3.1

Cíle

By the end of the course, you should be able to meet the following objectives:

- Define information security related concepts
- Explain different types of firewalls and their use cases
- Describe the operation of Intrusion Detection and Intrusion Prevention Systems
- Describe the VMware intrinsic security portfolio
- Implement Zero-Trust Security using VMware NSX® segmentation
- Configure User and Role Management
- Configure and troubleshoot Distributed Firewall, Identity Firewall, and time-based policies
- Configure and troubleshoot Gateway Security
- Use VMware vRealize® Log Insight™, VMware vRealize® Network Insight™, and NSX Intelligence to operate NSX firewalls and generate security recommendations
- Explain security best practices related to grouping, tagging, and rule configuration
- Describe North-South and East-West service insertion
- Describe Endpoint Protection
- Configure and troubleshoot Distributed IDS/IPS
- Describe the capabilities of Network Detection and Response

Určeno pro

- Experienced security administrators

Vstupní znalosti

You should also have the following understanding or knowledge:

- Good understanding of TCP/IP services and protocols
 - Knowledge and working experience of network security, including:
 - L2-L7 Firewalling
 - Intrusion Detection and Prevention Systems
 - Knowledge and working experience of VMware vSphere® environments and KVM-based environments
- The VMware Certified Technical Associate - Network Virtualization is recommended.

Program

- 1 Course Introduction
 - Introductions and course logistics
 - Course objectives
- 2 Security Basics
 - Define information security related concepts
 - Explain different types of firewalls and their use cases
 - Describe the operation of Intrusion Detection and Intrusion Prevention Systems
- 3 VMware Intrinsic Security
 - Define VMware intrinsic security strategy
 - Describe VMware intrinsic security portfolio
 - Explain how NSX-T Data Center aligns in the intrinsic security strategy
- 4 Implementing Zero-Trust Security
 - Define Zero-Trust Security
 - Describe the five pillars of a Zero-Trust Architecture
 - Define NSX segmentation and its use cases
 - Describe the steps needed to enforce Zero-Trust with NSX segmentation
- 5 User and Role Management
 - Integrate NSX-T Data Center and VMware Identity Manager™
 - Integrate NSX-T Data Center and LDAP
 - Describe the native users and roles in NSX-T Data Center
 - Create and assign custom user roles
- 6 Distributed Firewall
 - Configure Distributed Firewall rules and policies
 - Describe the Distributed Firewall architecture
 - Troubleshoot common problems related to Distributed Firewall
 - Configure time-based policies
 - Configure Identity Firewall rules
- 7 Gateway Security
 - Configure gateway firewall rules and policies
 - Describe the architecture of the gateway firewall
 - Identify and troubleshoot common gateway firewall issues
 - Configure URL analysis and identify common configuration issues
- 8 Operating Internal Firewalls
 - Use vRealize Log Insight, vRealize Network Insight, and NSX Intelligence to operate NSX firewalls
 - Explain NSX Intelligence visualization and recommendation capabilities
 - Explain security best practices related to grouping, tagging, and rule configuration
- 9 Network Introspection
 - Explain network introspection
 - Describe the architecture and workflows of North-South and East-West service insertion
 - Troubleshoot North-South and East-West service insertion
- 10 Endpoint Protection
 - Explain Endpoint Protection
 - Describe the architecture and workflows of endpoint protection
 - Troubleshoot endpoint protection
- 11 Advanced Threat Prevention
 - Describe the MITRE ATT&CK Framework
 - Explain the different phases of a cyber attack
 - Describe how NSX security solutions can be used to protect against cyber attacks
 - Configure and troubleshoot Distributed IDS/IPS
 - Describe the capabilities of Network Detection and Response
