Veritas NetBackup 9.1: Administration

Kod:	Czas trwania:	Cena netto:
VER_NB-9.1 A	40 Hours (5 days)	zł12,300.00

Description

Acquire the skills to make your data protection strategy successful with the Veritas NetBackup 9.1: Administration course. You will learn the general principles, configuration, and management of NetBackup, including how to best utilize the NetBackup tools and interfaces, effectively monitor backup and restore operations, and ensure that the data recovery objectives are met.

Cel szkolenia

After completing this course, you will be able to: -Describe the functions of the Primary/Master server, media servers, and clients.
-Describe how NetBackup backs up and restores data.
-Use the NetBackup Administration Console, Web User Interface, and OpsCenter.
-Configure and manage NetBackup security certificates.
-Configure, manage, and Monitor BasicDisk and AdvancedDisk storage units and storage unit groups.
-Configure file system backup policies and schedules. -Perform manual backups and user-directed backups.
-Restore files using the Java or Windows BAR interface and OpsCenter Operational Restore. • Provision storage and configure MSDP.
-Manage NetBackup cloud backups and cloud storage. -Optimize file system backups with NetBackup Accelerator.
-Backup, restore and protect virtual environments like VMware and Hyper-V.
-Configure Storage Lifecycle Policies (SLPs) and initiate jobs that use SLPs. -Protect and manage the NetBackup catalog.
-Configure NetBackup WORM protection. -Optimize NetBackup for performance.
-Generate NetBackup reports in NetBackup, OpsCenter, and APTARE IT Analytics. -Initiate NetBackup upgrades using VxUpdate.
-Identify and use resources for troubleshooting NetBackup, including the support information gathering tools.

Uczestnicy

This course is intended for technical professionals responsible for the design, configuration, operation, monitoring, or support of NetBackup.

Wymagania wstępne

Students should be familiar with general network and storage concepts, and the administration and configuration of Windows or Linux operating systems. Knowledge of virtualization and cloud technologies is useful.
