# Administering Microsoft Exchange Server 2016

<b>CODE:</b>	<b>DURÉE:</b>	<b>PRIX H.T.:</b>
MCS_20345-1	40 Hours (5 Jours)	€3,020.00

## Description

This 5-day instructor-led course teaches IT professionals how to administer and support Exchange Server 2016. Students will learn how to install Exchange Server 2016, and how to configure and manage an Exchange Server environment. The course covers how to manage mail recipients and public folders, including how to perform bulk operations using Exchange Management Shell. Students also will learn how to manage client connectivity, message transport and hygiene, how to implement and manage highly available Exchange Server deployments, and how to implement back up and disaster recovery solutions. The course also teaches students how to maintain and monitor an Exchange Server 2016 deployment. In addition, students will learn how to administer Exchange Online in an Office 365 deployment.

## Objectifs

- After completing this course, students will be able to:
- Perform deployment and basic management of Exchange Server 2016.
  - Manage Exchange Server 2016.
  - Create and manage various recipient objects in Exchange Server 2016.
  - Use Exchange Management Shell to create and manage various recipient objects in Exchange Server 2016, and perform various tasks to automate Exchange management procedures.
  - Configure client connectivity to Exchange Server 2016, and manage Client Access services.
  - Implement and manage high availability.
  - Implement backup and disaster recovery for Exchange Server 2016.
  - Configure message transport options.
  - Configure message hygiene and security options.
  - Implement and manage Exchange Online deployments.
  - Monitor and troubleshoot Exchange Server 2016.
  - Secure and maintain Exchange Server 2016.

## Audience

This course is primarily intended for people aspiring to become enterprise-level messaging administrators for Exchange Server 2016. IT generalists and help-desk professionals who want to learn about Exchange Server 2016 might also take this course. Students taking this course are expected to have at least two years of experience working in the IT field—typically in the areas of Windows Server administration, network administration, help desk, or system administration. They are not expected to have experience with previous Exchange Server versions.

The secondary audience for this course includes IT professionals who take this course as preparation material for exam 70-345: Designing and Deploying Microsoft Exchange Server 2016, or as part of the requirement for the MCSE: Microsoft Exchange Server 2016 certification.

## Prérequis

Before attending this course, students must have:

A minimum two years of experience administering Windows Server, including Windows Server 2012 R2 or Windows Server 2016.

A minimum two years experience working with active Directory Domain Services (AD DS). A minimum two years of experience working with name resolution including Domain Name System (DNS).

Understanding of TCP/IP and networking concepts.

Understanding of Windows Server 2012 R2 or later, and AD DS, including planning, designing, and deploying.

Understanding of security concepts such as authentication and authorization.

Understanding of Simple Mail Transfer Protocol (SMTP).

Working knowledge of public key infrastructure (PKI) technologies, including Active Directory Certificate Services (AD CS).

## Programme

### Module 1: Deploying Microsoft Exchange Server 2016

This module describes the key features and enhancements in Exchange Server 2016. The module also describes the deployment requirements and options for implementing Exchange Server 2016.

Overview of Exchange Server 2016

Lessons Requirements and deployment options for Exchange Server 2016 Lab : Deploying Microsoft Exchange Server 2016

Evaluating requirements and prerequisites for an Exchange Server 2016 installation

Deploying Exchange Server 2016

After completing this module, students will be able to:

Describe the features and functionality of Exchange Server 2016.

Describe the requirements and deployment options for Exchange Server 2016.

### Module 2: Managing Microsoft Exchange Server 2016 servers

This module describes the built-in management tools that you can use to manage maintain and maintain Exchange Server 2016. The module also explains the features and functionality of a Mailbox server role and procedures for configuring a Mailbox server.

Exchange Server 2016 management

Overview of the Exchange 2016 Mailbox server

Lessons Configuring Mailbox servers Lab : Configuring Mailbox servers

Creating and configuring mailbox databases After completing this module, students will be able to:

Describe Microsoft Exchange Server 2016 management.

Describe the Exchange Server 2016 Mailbox server role.

Configure mailbox servers

Module 3: Managing recipient objects

This module describes the types of recipient objects in Exchange Server 2016, and explains how to manage these objects. The module also describes how to manage address lists and policies on the Mailbox server role.

Exchange Server 2016 recipients

Managing Exchange Server recipients

Lessons Configuring address lists and policies Lab : Managing Exchange Server recipients and public folders

Managing recipients

Managing public folder mailboxes Lab : Managing Exchange Server email address lists and policies

Managing email-address policies

Managing address lists and address book policies After completing this module, students will be able to:

Describe the different Microsoft Exchange Server 2016 recipients.

Manage Exchange Server 2016 recipients.

Configure address lists and policies.

### Module 4: Managing Microsoft Exchange Server 2016 and recipient objects by using Exchange Management Shell

This module provides an overview of the Exchange Management Shell, and describes how to use it to manage Exchange Server 2016 configuration and recipient objects.

Overview of the Exchange Management Shell

Managing Exchange Server 2016 by using Exchange Management Shell

Lessons Managing Exchange Server 2016 by using Exchange Management Shell scripts

Lab : Managing Exchange Server and recipient objects by using Exchange Management Shell

Using Exchange Management Shell to manage recipients

Using Exchange Management Shell to manage Exchange Server After completing this module, students will be able to:

Explain the Exchange Management Shell cmdlets that you can use to configure and manage Microsoft Exchange Server 2016.

Manage Exchange Server and recipient objects by using the Exchange Management Shell.

Manage Exchange Server and recipient objects by using the Exchange Management Shell scripts.

### Module 5: Implementing client connectivity

This module describes how to configure and manage Client Access Services in Exchange Server 2016. The module also explains the options for configuring client connectivity, Microsoft Outlook on the web, and mobile messaging.

Configuring client access services in Exchange Server 2016

Managing client services

Client connectivity and publishing of Exchange Server 2016 services

Configuring Outlook on the web

Lessons Configuring mobile messaging on Exchange Server 2016

## Monitoring Exchange Server 2016

Lessons Troubleshooting Exchange Server 2016 Lab : Monitoring and troubleshooting Exchange Server 2016

Monitoring Exchange Server

Troubleshooting database availability

Troubleshooting client access services After completing this module, students will be able to:

Monitor Exchange Server 2016.

Troubleshoot Exchange Server 2016. Module 12: Securing and maintaining Exchange Server 2016

This module describes how to maintain and update an Exchange Server organization. The module explains how to plan and configure administrative security and administrative auditing in Exchange Server 2016.

Securing Exchange Server with role-based access control (RBAC)

Configuring audit logging on Exchange Server 2016

Lessons Maintaining Exchange Server 2016

Configuring Exchange Server permissions

Configuring audit logging

Lab : Securing and maintaining Exchange Server 2016 Maintaining updates on Exchange Server 2016.

Configure RBAC on Microsoft Exchange Server 2016.

Configure options related to user and administrator audit logging.

After completing this module, students will be able to: Maintain and update Exchange Server 2016.
