Check Point Certified Cloud Specialist (CCCS)

| CODE: | LENGTH: | PRICE: |
|----------------|-------------------|-----------|
| CKT_CCCS_R80.X | 16 Hours (2 days) | €1,950.00 |

Description

2-day Specialist course which provides an understanding of the basic concepts and skills necessary to configure and deploy Check Point CloudGuard IaaS products in public cloud platforms such as Microsoft Azure, Amazon Web Services (AWS), and Google Cloud Platform.

Objectives

Understanding Cloud Fundamentals
Introducing CloudGuard Protections
Deploying CloudGuard CloudGuard Security Policy
Automating CloudGuard Protections
Dome9 Security for IaaS Cloud Infrastructure

Audience

This course is designed for technical professionals who support, install, deploy, or manage Check Point CloudGuard IaaS solutions within their security environment.

Prerequisites

CCSA Basic knowledge of networking 6 months to 1 year of experience with Check Point products recommended

Programme

Build secure public Azure and AWS clouds using the hub and spoke network architecture
Deploy a Check Point Security Management server
Configure the CloudGuard service and Security Gateway autoprovisioning operations on the Security Management Server
Manually deploy a Security Gateway in the South hub Autoprovision Security Gateways in the North hub and the South hub
Launch a web server in each spoke network
Create a Security Policy that allows inbound traffic to reach the hubs and web servers inside the spoke virtual networks
Connect the CloudGuard Controller to Azure and AWS clouds and import cloud objects into the Security Policy
Test web server connectivity Test security protections with the Check Me tool
