# Configuring BIG-IP AFM: Advanced Firewall Manager v16.1

CODE: LENGTH: PRICE:

F5N BIG-AFM 16 Hours (2 days) kr16,500.00

# **Description**

This 2-day course uses lectures and hands-on lab exercises to give participants real-time experience in setting up and configuring the BIG-IP® Advanced Firewall Manager system.

Students are introduced to the AFM user interface, stepping through various options that demonstrate how AFM is configured to build a network firewall and to detect and protect against DoS (Denial of Service) attacks. Reporting and log facilities are also explained and used in the course labs.

Further Firewall functionality and additional DoS facilities for DNS and SIP traffic are discussed. Course Topics

- Configuration and management of the BIG-IP AFM system
- · AFM Network Firewall concepts
- · Network firewall options and modes
- Network firewall rules, policies, address/port lists, rule lists and schedules
- IP Intelligence facilities of dynamic black and white lists, IP reputation database and dynamic IP shunning
- · Detection and mitigation of DoS attacks
- Event logging of firewall rules and DoS attacks
- · Reporting and notification facilities
- DoS Whitelists
- DoS Sweep/Flood
- DNS Firewall and DNS DoS
- SIP DoS
- Port Misuse
- Network Firewall iRules
- Various AFM component troubleshooting commands

# **Objectives**

Introducing the BIG-IP System
Initially Setting Up the BIG-IP System
Archiving the BIG-IP Configuration
Leveraging F5 Support Resources and Tools
Chapter Resources

#### **Audience**

This course is intended for network operators, network administrators, network engineers, network architects, security administrators, and security architects responsible for installation, setup, configuration, and administration of the BIG-IP AFM system.

# **Prerequisites**

Students must complete one of the following F5 prerequisites before attending this course:

Administering BIG-IP instructor-led course

or

F5 Certified BIG-IP Administrator

The following free web-based courses, although optional, will be very helpful for any student with limited BIG-IP administration and configuration experience. These courses are available at F5 University:

Getting Started with BIG-IP web-based training

Getting Started with BIG-IP Local Traffic Manager (LTM) web-based training

Getting Started with BIG-IP Advanced Firewall Manager (AFM) web-based training

The following general network technology knowledge and experience are recommended before attending any F5 Global Training Services instructor-led course:

OSI model encapsulation

Routing and switching

Ethernet and ARP

TCP/IP concepts

IP addressing and subnetting v12 Course Outline Chapter 1: Setting up the BIG-IP System

Introducing the BIG-IP System

The following course-specific knowledge and experience is suggested before attending this course: HTTP and DNS protocols

#### **Further Information**

Course Changes since v15

Updates for the v16.1 release are minor. Course material including student guide and labs steps have been updated to reflect the version change and for any product changes to GUI appearance and screen options.
