Deploy & Manage Citrix SD-WAN Essentials

CODE:	LENGTH:	PRICE:
CTX-CNS-230	3 days	\$3,000.00

Description

Learn the various SD-WAN implementations and deployment modes available, and how to choose the one that is right for your organization. Take a tour of the underlying architecture of SD-WAN and learn how to differentiate between the various components. Understand how the different elements of SD-WAN come together to provide a better network experience. Topics include: Quality of Service, Classes of Service, Rules, Dynamic Routing, DHCP Services, Zero Touch Deployment and the SD-WAN management tools available. Hands-on labs to be provided.

Objectives

Upon successful completion of this course, learners are able to:

- Deployment options available
- Initial configuration and management of Citrix SD-WAN
- Provisioning and management considerations
- SD-WAN security considerations
- SD-WAN optimizations available

Audience

Built for IT Professionals working with Citrix SD-WAN, with little or no previous SD-WAN experience. Potential students include administrators, engineers, and architects interested in learning how to deploy or manage Citrix SD-WAN.

Prerequisites

Recommended Prerequisite Knowledge:

- Understanding of different computer networks such as LAN and WAN
- Familiarity with data-carrying techniques, including Multiprotocol Label Switching (MPLS), Metro Ethernet, and VPN tunneling
- Understanding of techniques for increasing data transfer efficiencies / WAN optimization
- General understanding of branch network technologies; Routing, Firewall, DHCP, Internet control, Quality of Service

Programme

	Citrix SD-WAN Functionality
Module 1: Citrix SD-WAN Introduction and Overview	Platforms & Editions
	Initial Configuration
	Deployment Mode Options
	Multi-Region Deployment
	Interface Groups
	Virtual IP Addresses
Module 2: Citrix SD-WAN Deployment Modes and Configuration	WAN Links
	Change Management
	Upgrading Deployments
	Zero Touch Deployment Options
Module 3: Citrix SD-WAN Provisioning and Change Management	Appliance Architecture
	SD-WAN Management Architecture Options
	Packet Processing and Architecture
	SD-WAN Services

Citrix SD-WAN Physical Security
Appliance Security Considerations
Network Security
Stateful Firewall Considerations
Firewall Rules and Zones

Module 4: Citrix SD-WAN Security Considerations Security Administration and Management
Citrix SD-WAN Quality of Service
Classes of Service and Rules
Application Quality of Service
SD-WAN Transmit Modes
Bandwidth Provisioning
Deep Packet Inspection

Module 5: Citrix SD-WAN Quality of Service
Dynamic Routing
IPsec Termination
MPLS Queues
Path State Sensitivity Control
Virtual Router Redundancy Protocol Support

Module 6: Citrix SD-WAN Optimizations

Test and Certification

This course helps prepares candidates to get the CC-SDWAN certification.

Session Dates

On request. Please [contact us](#)

Additional Information

[This training is also available as onsite training. Please contact us to find out more.](#)
