Check Point Certified Endpoint Specialist (CCES)

CHECK POINT

CODE:	**LENGTH:**	**PRICE:**
CKT_CCES_R80.X	16 Hours (2 days)	€1,950.00

Description

COURSE GOAL: Provide a comprehensive understanding of Check Point Endpoint Security and how to deploy it within the corporate network environment.

Objectives

- Explain how Endpoint Security works to enforce corporate security compliance for end users and their devices.
- Become familiar with the Check Point Endpoint Security Solution architecture and how it integrates with Check Point Network Security Management.
- Identify and describe key elements of the SmartEndpoint Management console.
- Discuss Endpoint Security Software Blade options and how they are managed from the SmartEndpoint Management console.
- Explain how to create and assign security policies for Endpoint clients using Endpoint Security.
- Understand deployment methods and server considerations for Endpoint Security Management installation.
- Identify the different ways to install and configure Endpoint clients.
- Recognize how to configure VPN connectivity to allow clients connecting outside of the network perimeter to securely access corporate resources.
- Understand how Endpoint Security authenticates and verifies clients connecting to the Endpoint Security Management Server.
- Describe additional server configurations that are available to help manage Endpoint clients.
- Recognize the different types of data security protections available to deploy on end user machines.
- Describe how Full Disk Encryption technology protects and recovers data accessed and stored on Endpoint computers.
- Understand how to secure removable media devices.
- Become familiar with the Remote Help tool and how it supports clients experiencing FDE and Media Encryption issues.
- Recognize the types of threats that target Endpoint computers.
- Describe Check Point SandBlast Agent and how to deploy it in the Endpoint Security environment.
- Explain how SandBlast Agent technology prevents malware from infiltrating Endpoint machines and corporate resources.
- Identify SmartEndpoint reporting tools used to monitor and respond quickly to security events.
- Understand how to troubleshoot and debug issues.

Audience

Technical professionals who need to deploy and manage Endpoint Security within their security environment.

Prerequisites

Check Point CCSA and CCSE Certification

Programme

COURSE TOPICS	LAB EXERCISES
- Introduction to Endpoint Security	- Installing the Endpoint Security Management Solution
- Endpoint Security Management	- Deploying Endpoint Client Packages
- Deploying Endpoint Security	- Deploying Endpoint Policy Servers
- Additional Endpoint Server Configurations	- Configuring High Availability for Endpoint Security
- Data Security Protection	- Modifying Client Installations
- Advanced Threat Prevention	- Working with Deployment Rules
- Reporting and Troubleshooting	- Working with SandBlast Agent

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
14 May 2024	Virtual Classroom	CEDT	English	Instructor Led Online		€1,950.00
23 Jul 2024	Virtual Classroom	CEDT	English	Instructor Led Online		€1,950.00
08 Oct 2024	Virtual Classroom	CEDT	English	Instructor Led Online		€1,950.00
03 Dec 2024	Virtual Classroom	CET	English	Instructor Led Online		€1,950.00
