IBM Cognos Analytics: Author Reports Fundamentals (v11.0.x) French

CODE:	LENGTH:	PRICE:
B6158FG	24 Hours (3 dage)	kr 17,460.00

Description

This offering provides Business and Professional Authors with an introduction to report building techniques using relational data models. Techniques to enhance, customize, and manage professional reports will be explored. Activities will illustrate and reinforce key concepts during this learning opportunity.

This is a fully translated French course - all materials including the lab environment are provided in French. To see a translated overview of this course, visit <https://ibm.biz/BdzQMR>

Objectives

- What is IBM Cognos Analytics – Reporting
- Examine dimensionally modelled and dimensional data sources
- Examine personal data sources and data modules
- Examine List reports
- Aggregate measure/fact data
- Use shared dimensions to create multi-fact queries
- Add repeated information to reports
- Create crosstab reports
- Create complex crosstab reports
- Format, sort, and aggregate data in a crosstab report
- Create discontinuous crosstab reports
- Create Visualization reports
- Add business logic to reports using IBM Cognos Analytics – Reporting
- Focus reports using filters
- Focus reports using prompts
- Augment reports using calculations
- Extend report functionality in IBM Cognos Analytics - Reporting
- Customize reports with conditional formatting
- Conditionally format one crosstab measure based on another
- Drill-through definitions
- Enhance the report layout
- Use additional report building techniques

Audience

Report Authors

Prerequisites

- Knowledge of your business requirements
- IBM Cognos Analytics for Consumers (v11.0) WBT or equivalent knowledge

Programme

- Examine personal data sources and data modules
 - Upload personal data
 - Upload custom images
 - Use navigation paths
- What is IBM Cognos Analytics - Reporting?
 - Create a simple list report
 - Create a report from a dimensionally modeled relational data source
- Examine list reports
 - Group data in a list
 - Format columns in a list
 - Include headers and footers in a list
 - Enhance a list report
- Aggregate measure/fact data
 - Identify differences in aggregation
 - Explore data aggregation
 - Create a multi-fact query in a list report
- Use shared dimensions to create multi-fact queries
 - Create a multi-fact query in a list report
- Create crosstab reports
 - Add measures to a crosstab
 - Add items as peers
- Create complex crosstab reports
 - Create crosstab nodes and crosstab members
 - Create a complex crosstab report
- Add repeated information to reports
 - Data sources for a crosstab
 - Create a simple crosstab report
- Create a mailing list report
 - Create a simple crosstab report
- Format, sort, and aggregate data in a crosstab
 - Create discontinuous crosstab reports
- Sort, format, and aggregate a crosstab report
 - Present unrelated items using a discontinuous crosstab
- Create a visualization report
 - Focus reports using filters
- Create and format a visualization report
 - Apply filters to a report
- Create a report that uses a Map visualization
 - Apply a detail filter on fact data in a report
- Show the same data graphically and numerically
 - Apply a summary filter to a report
- Focus reports using prompts
 - Create a prompt by adding a parameter
- Create a value prompt to a report
 - Augment reports using calculations
- Add a Select & search prompt to a report
 - Add calculations to a report
- Create a cascading prompt
 - Display prompt selections in the report title
- Customize reports with conditional formatting
 - Drill-through definitions
- Create a multilingual report
 - Let users navigate to related data in IBM Cognos Analytics
- Highlight exceptional data and conditionally render a column
 - Use additional report building techniques
- Enhance report layout
 - Section a report and reuse objects within the same report
- Create a report structured on data items
 - Reuse layout components in a different report
- Create a condensed list report
 - Explore options for reports that contain no data
