## FortiGate II - NSE 4 - The Secured Network Deployment and IPsec VPN course FortiOS

CODE:	LENGTH:	PRICE:
FNT_SEII	16 Hours (2 days)	€1,650.00

### Description

In this two-day course, candidates will learn how to use advanced FortiGate networking and security features. Topics include features commonly applied in complex or larger enterprise or MSSP networks, such as advanced routing, transparent mode, redundant infrastructure, site-to-site IPsec VPN, SSO, web proxy, and diagnostics.

### Objectives

After completing these modules, candidates will be able to:

- Analyze a FortiGate's route table.
- Route packets using policy-based and static routes for multi-path and load balanced deployments.
- Configure SD-WAN to load balance traffic between multiple WAN links effectively.
- Inspect traffic transparently, forwarding as a Layer 2 device.
- Divide FortiGate into two or more virtual devices, each operating as an independent FortiGate, by configuring virtual domains (VDOMs).
- Establish an IPsec VPN tunnel between two FortiGate appliances.
- Compare policy-based to route-based IPsec VPN.
- Implement a meshed or partially redundant VPN.
- Diagnose failed IKE exchanges.
- Offer Fortinet Single Sign On (FSSO) access to network services, integrated with Microsoft Active Directory.
- Deploy FortiGate devices as an HA cluster for fault tolerance and high performance.
- Deploy implicit and explicit proxy with firewall policies, authentication, and caching.
- Diagnose and correct common problems.

### Audience

Networking and security professionals involved in the design, implementation, and administration of a network infrastructure using FortiGate appliances.

This course assumes knowledge of basic FortiGate fundamentals. Participants should have a thorough understanding of all the topics covered in the FortiGate Security course before attending the FortiGate Infrastructure course.

### Prerequisites

- Knowledge of OSI layers
- Knowledge of firewalling concepts in an IPv4 network
- Knowledge of the fundamentals of FortiGate, as presented in the FortiGate Security course

### Programme

- 1.Routing
- 2.Software-Defined WAN (SD-WAN)
- 3.Virtual Domains
- 4.Layer 2 Switching
- 5.Site-to-Site IPsec VPN
- 6.Fortinet Single Sign-On (FSSO)
- 7.High Availability (HA)
- 8.Web Proxy
- 9.Diagnostics

## Test and Certification

This course and the FortiGate Security course are intended to help participants prepare for the NSE 4 certification exam.
