24 Hours (3 Tage)

€1,695.00

**Description**

This course is designed for experienced technical professionals who will be planning, installing, configuring and supporting deployments in production environments.

The course is expected to take 3 days (24 hours) to complete, of which approximately 9 hours will be spent on the practical exercises.

On completion of this course, trainees will be able to:

- Design and installation considering all variables

- Undertake a multi-site installation appropriate for a customer environment
- Explain the function of core components, how they work, and how to configure them
- Track the source of infections and cleanup infected devices
- Perform preliminary troubleshooting and basic support of customer environments

**Voraussetzungen**

Prior to taking this course you must:

- Have completed and passed the Sophos Central Certified Engineer course (ET15)

We also recommend that you have the following knowledge and experience:

- Experience with Windows networking and the ability to troubleshoot issues
- Experience managing Active Directory
- Experience in troubleshooting basic errors Please ensure that you bring your laptop with you to the class.

**Test und Zertifizierung**

To complete the course, trainees must take and pass an online assessment. The assessment tests their knowledge of both the presented and practical content. The pass mark for the assessment is 80%, and is limited to 3 attempts.
